Disasterology is a passionate and personal account of a country in crisis one unprepared to deal with the disasters of today and those looming in our future With temperatures rising and the risk of disasters growing our world is increasingly vulnerable Most people see disasters as freak natural events that are unpredictable and unpreventable But that simply isn't the case disasters are avoidable but when they do strike there are strategic ways to manage the fallout In Disasterology Dr Montano a disaster researcher brings readers with her on an eye opening journey through some of our worst disasters helping readers make sense of what really happened from an emergency management perspective She explains why we aren't doing enough to prevent or prepare for disasters the critical role of media and how our approach to recovery was not designed to serve marginalized communities Now that climate change is contributing to the disruption of ecosystems and worsening disasters Dr Montano offers a preview of what will happen to our communities if we don't take aggressive immediate action In a section devoted to the COVID 19 pandemic what is thus far our generation's most deadly disaster she casts light on the many decisions made behind closed doors that failed to protect the public A deeply moving and timely narrative that draws on Dr Montano's first hand experience in emergency management Disasterology is essential reading for anyone who wants to understand how our country handles disasters and how we can better face them together The

Laura M. Mac Donald,2009-05-26 In 1917 the port of Halifax Nova Scotia was crowded with ships leaving for war torn Europe On December 6th two of them the Mont Blanc and the Imo collided in the Narrows a hard to navigate stretch of the harbor Ablaze and with explosions on her deck filling the sky the Mont Blanc grounded against the city's docks As thousands rushed to their windows and into the streets to watch she exploded with such force that the 3 121 tons of her iron hull vaporized in a cloud that shot up more than 2 000 feet the explosion was so unusual that Robert Oppenheimer would study its effects to predict the devastation of an atomic bomb The blast caused a giant wave that swept over parts of the city followed by a slick black rain that fell for ten minutes Much of the city was flattened and not one in 12 000 buildings within a 16 mile radius left undamaged More than 1 600 Halifaxians were killed and 6 000 injured and within twenty four hours a blizzard had isolated Halifax from the world Set vividly against the background of World War I Curse of the Narrows is the first major account of the world's largest pre atomic explosion the epic relief mission from Boston and the riveting trial of the Mont Blanc's captain and pilot Laura M Mac Donald is as adept at describing the dynamics of a chain reaction explosion as she is at chronicling unforgettable human dramas of miraculous survival unfathomable loss and the medical breakthroughs in pediatrics and eye surgery that followed the disaster Using primary sources many of which haven't been read in decades and with a wonderful feel for narrative history Mac Donald chronicles one of the most compelling and dramatic events of the 20th century *Disasters, Collective Behavior, and Social Organization* Russell Rowe Dynes,Kathleen J.
