prospect of a sovereign debt default in the eurozone's flaky fringe sent shock waves through the European and global economies Examining the crucial initial phase when the financial crisis was just beginning to spill over into the real economy the volume surveys the impact of the September 2008 Lehman Brothers collapse across the EU's southern periphery The six South European eurozone members Italy Greece Spain Portugal Cyprus and Malta are viewed in comparative perspective with EU candidate state and non eurozone member Turkey In an era before the spectacular EU IMF bailouts the picture that emerges is one of national differentiation illuminating these countries different starting points and varying policy responses in the face of the gathering financial storm This book was published as a special issue of South European Society and Politics
