the Media William Merrin,2005 Baudrillard and the Media is the first in depth critical study of Jean Baudrillard s media theory Rejecting the common positioning of Baudrillard within the discipline as a postmodernist it argues instead for the necessity of a fuller reading of his ideas and critical project Merrin offers an overview and evaluation of his key arguments and themes focusing especially upon the organising principle of his work his theory of symbolic exchange and critique of the semiotic and of simulation Upon this basis the book also resituates Baudrillard within media theory developing an original critical re reading of his relationship with McLuhanism and arguing for the significance instead of hitherto neglected influences such as Boorstin Emphasizing his critical value and contemporary relevance Baudrillard and the Media also provides the most detailed exploration yet of Baudrillard s theory of the non event considering its applicability through case studies of his controversial analyses of the Gulf War of 9 11 and the Afghan and Iraq Wars and of his own appearance in the film The Matrix Considering also Baudrillard s discussion of cinema his theory and personal practice of photography and his critique of new media the book concludes with an evaluation of his place within media and communication studies and an argument for his importance for this field Students and scholars of the media and media theory in particular will welcome this clear and comprehensive study **The Economics of Fantasy** Sharon Stockton,2006 The author examines the

evolution of the rape narrative in twentieth century literature What accounts for the persistence of the old story of male power and violence and female passivity and penetrability How has the story changed over the course of the twentieth century She investigates the manner in which the violation of the female body serves as a metaphor for a synthesis of masculinity and political economy [Insurgency Online](#) Michael York Dartnell,2006-01-01 In Insurgency Online Michael Dartnell focuses on a new form of conflict made possible by global communications The Internet Dartnell argues is affecting extensive changes to the way politics are carried out by inserting a range of non state actors onto the global political stage He demonstrates that Web activism raises issues about the organization of societies and the distribution of power and

contends that the development of online activism has far reaching social and political implications with parallels to the influence of the invention of the printing press the telegraph and the radio Dartnell concentrates on Web activists who use the Net as a media tool distinguishing this use from information terrorism which threatens or harasses through hacking or electronic sabotage Using the examples of the Revolutionary Association of the Women of Afghanistan RAWA which opposed the Taliban the Peruvian Movimiento Revolucionario Tupac Amaru MRTA and its campaign against the Fujimori government and the Irish Republican Socialist Movement IRSM Dartnell evaluates the political implications and general character of Web activism among non state actors Insurgency Online shows that online activism is a ripe new territory for non governmental actors to raise awareness and develop support around the world

Making the Heavens Speak Peter Sloterdijk, 2023-01-05 The idea of a connection between poetry and religion is as old as civilization Homer consulted the Olympian gods on the fate of the fighters on the plain before Troy and the poet made the heavenly ones speak It was through poetry that the gods were brought within reach of human hearing In the centuries after Homer the Athenian stage became the setting where gods made their poetic

interventions resolving human impasses and contributing to the emotional synchronization of the public life of the city Sloterdijk argues that as with the culture of the Ancient Greeks all religions inscribe a kind of theopoetry at the heart of their cultural life and thought even as they strenuously obscure these poetic origins through the cultivation and enforcement of orthodox norms Sloterdijk also shows how in conditions of religious pluralism religions poetically reshape themselves to accommodate the demands of the religious marketplace This highly original study of the poetic devices that inform accounts of the otherworldly offers a new interpretation of religious practice and its theological elaboration through history as well as a fresh perspective on our contemporary age in which collective life interwoven with imaginative fabrications is fraying under critical stress

Exits to the Posthuman Future Arthur Kroker, 2014-03-12 Exits to the Posthuman Future is media theory for a global digital society which thrives and sometimes perishes at the intersection of technologies of speed distant ethics and a pervasive cultural anxiety Arthur Kroker's incisive and insightful text presents the emerging pattern of a posthuman future life at the tip of technologies of acceleration drift and crash Kroker links key concepts such as Guardian Liberalism and Obama's vision of the Just War with a striking account of culture drift as the essence of real world technoculture He argues that contemporary society displays growing uncertainty about the ultimate ends of technological innovation and the intelligibility of the digital future The posthuman future is elusive is it a gathering storm of cynical abandonment inertia disappearance and substitution Or else the development of a new form of critical consciousness the posthuman imagination as a means of comprehending the full complexity of life Depending on which exit to the posthuman future we choose or perhaps which exit chooses us Kroker argues that a very different posthuman future will likely ensue
