Post Modern Perspective On Curriculum:

A Post-Modern Perspective on Curriculum William E. Doll Jr., 1993 Doll draws relationships among the ideas advanced in chaos theory Piagetian epistemology cognitive theory and the work of Dewey and Whitehead In this book on the post modern perspective on the curriculum the author asserts that the post modern model of organic change is not necessarily linear uniform measured and determined but is one of emergence and growth made possible by interaction transaction disequilibrium and consequent equilibrium Transformation not a set course the book argues should be the rule and open endedness is an essential feature of the post modern framework In the book the author envisages a curriculum in which the teacher s role is not causal but transformative The curriculum is not the race course but the journey itself metaphors can be more useful than logic in generating dialogue in the community and educative purpose planning and evaluation is flexible and focused on process not product Scholarly yet direct and to the point Doll s ideas make sense to front line educators in the real world of today s schools Kenneth Graham Seaford Union Free School District Curriculum Development in the Postmodern Era Patrick Slattery, 2012-12-06 First Published in 2006 Routledge is an imprint of Taylor Francis an informa company **Curriculum Development in the Postmodern Era** Patrick Slattery, 2006 This landmark text was one of the first to introduce and analyze contemporary concepts of curriculum that emerged from the Reconceptualization of curriculum studies in the 1970s and 1980s This new edition brings readers up to date on the major research themes postmodernism ecological hermeneutics aesthetics and arts based research race class gender sexuality and classroom practices within the historical development of the field from the 1950s to the present Like the previous editions it is unique in providing a comprehensive overview in a relatively short and highly accessible text Provocative and powerful narratives both biography and autoethnography throughout invite readers to engage the complex theories in a personal conversation School based examples allow readers to make connections to schools and society teacher education and professional development of teachers Changes in the Third Edition New Glossary brief summaries in the text direct readers to the Companion Website to read the entire entries New analysis of the current accountability movement in schools including the charter school movement More international references clearly connected to international contexts More narratives invite readers to engage the complex theories in a personal conversation Companion Website new for this edition

Paradigm Debates in Curriculum and Supervision Linda Behar-Horenstein, Jeffrey Glanz, 2000-01-30 Paradigm debates in the educational research community are a frequent if not common occurrence How do paradigm debates in other educational fields such as curriculum and supervision shape educators understanding and practice In this volume it is suggested that educators adherence to particular views of curriculum and supervision is influential in guiding their beliefs and subsequent actions For example a widely accepted belief is that if an individual adopts a mechanistic view of the curriculum then s he is likely to deliver a curriculum grounded in pre established objectives and evaluate student achievement in relationship to

formulated objectives Postmodernists contend that such educators are bound by rigid bifurcation and a constrictive linear logic In supervision educational leaders who favor leadership styles comprised by autocratic behaviors tend to create school climates that favor a top down approach to human relationships Autocratic leaders rely on hierarchical organizational structures and styles that seek to instill compliance and subordination Yet prospective administrators who want concrete proposals put in practice find modern perspectives of supervision helpful In contrast postmodern supervisors allege that such leaders disallow the emergence of relevant and authentic relationships that might occur when conventional hierarchical structures are diminished and open lines of communication between teachers students administrators become normative The chapters in this book present an in depth analysis of how an individual s predisposition towards modern and postmodern views of curriculum and supervision are likely to influence 1 curriculum development 2 teaching styles 3 leadership styles 4 teacher and student evaluation and 5 the missions intrinsic to the creation of professional preparation programs that serve to promulgate existing practice or create a new order of teachers and administrator

Educational Yearning Thomas Oldenski, Dennis Carlson, 2002 What room is there for a language of spirituality and the spirit in democratic forms of education This is the question posed in this collection of essays by a broad range of scholars working in education Beginning with the premise that postmodernism is associated with a re spiritualization of culture the authors seek to explore ways in which this re spiritualization can be pushed in democratic rather than rightist or fundamentalist directions What they celebrate is diversity of progressive traditions and discourses of spirituality that educators and other cultural workers can draw upon to inform practice even as they trouble all essentialistic notions of spirituality Together these essays move democratic education onto a fundamentally new cultural terrain and they suggest

that the metaphor of the journey of the spirit is one of the most enduring and potentially democratic ways of thinking about what it means to teach and to become educated The Genetic Epistemologist ,1999 *Knowledge and Power in the Global Economy* David Gabbard,2000 Illuminates how the meaning of language used to discuss the role reform of US public schools reflects an essentially economic view of the world and offers a set of alternative concepts meanings for reformulating the role of US public schools **Education Reform and Innovation in Namibia** Teresa Sguazzin,Mariana van Graan,1999
