Post Structuralist Classics:

Post-Structuralist Classics Andrew Benjamin, 2016-08-19 Modern literary theory is increasingly looking to philosophy for its inspiration After a wave of structural analysis the growing influence of deconstruction and hermeneutic readings continues to bear witness to this This exciting and important collection first published in 1988 reveals the diversity of approaches that mark the post structuralist endeavour and provides a challenge to the conventional practice of classical studies and ancient philosophy This book will be of interest to students of ancient philosophy classical studies and literary theory

Modern Critical Theory and Classical Literature J.P. Sullivan, Irene J.F. de Jong, 2018-07-17 In recent decades the study of literature in Europe and the Americas has been profoundly influenced by modern critical theory in its various forms whether Structuralism or Deconstructionism Hermeneutics Reader Response Theory or Rezeptions sthetik Semiotics or Narratology Marxist feminist neo historical psychoanalytical or other perspectives Whilst the value and validity of such approaches to literature is still a matter of some dispute not least among classical scholars they have had a substantial impact on the study both of classical literatures and of the mentalit of Greece and Rome In an attempt to clarify issues in the debate the eleven contributors to this volume were asked to produce a representative collection of essays to illustrate the applicability of some of the new approaches to Greek and Latin authors or literary forms and problems The scope of the volume was deliberately limited to literary investigation broadly construed of Greek and Roman authors Broader areas of the history and culture of the ancient world impinge in the essays but are not their central focus The volume also contains a separate bibliography offering for the first time a complete bibliography of classical studies which incorporate modern critical theory

Literary Construction of Identity in the Ancient World Hanna Liss, Manfred Oeming, 2010-06-30 Encountering an ancient text not only as a historical source but also as a literary artifact entails an important paradigm shift which in recent years has taken place in classical and Oriental philology Biblical scholars Egyptologists and classical philologists have been pioneers in supplementing traditional historical critical exegesis with more literary approaches This has led to a wealth of new insights While the methodological consequences of this shift have been discussed within each discipline until recently there has not been an attempt to discuss its validity and methodology on an interdisciplinary level In 2006 the Faculty of Bible and Biblical Interpretation at the Hochschule f r J dische Studien Heidelberg and the Faculty of Theology at the University of Heidelberg invited scholars from the U S Canada the Netherlands Israel and Germany to examine these issues Under the title Literary Fiction and the Construction of Identity in Ancient Literatures Options and Limits of Modern Literary Approaches in the Exegesis of Ancient Texts experts in Egyptology classical philology ancient Near Eastern studies biblical studies Jewish studies literary studies and comparative religion came together to present current research and debate open questions At this conference each representative from a total of 23 different disciplines dealt with literary theory in regard to his or her area of research The present volume organizes 17 of the resulting essays along 5

thematic lines that show how similar issues are dealt with in different disciplines 1 Thinking of Ancient Texts as Literature 2 The Identity of Authors and Readers 3 Fiction and Fact 4 Rereading Biblical Poetry and 5 Modeling the Future by Reconstructing the Past Nancy, Blanchot Leslie Hill,2018-09-30 The concept of community is one of the most frequently used and abused of recent philosophical or socio political concepts In the 1980s faced with the imminent collapse of communism and the unchecked supremacy of free market capitalism the philosopher Jean Luc Nancy in The Inoperative Community and the writer Maurice Blanchot in The Unavowable Community both thought it essential to rethink the fundamental basis of community as such More recently Nancy has renewed the debate by unexpectedly attacking Blanchot s account of community claiming that it embodies a dangerously nostalgic desire for mythic and religious communion This book examines the history and implications of this controversy It analyses in forensic detail Nancy s and Blanchot s contrasting interpretations of German Romanticism and the work of Heidegger Bataille and Marguerite Duras and examines closely their divergent approaches to the contradictory legacy of Christianity At a time when politics are increasingly inseparable from a deep seated sense of crisis it provides an incisive account of what in the concept of community is thought yet crucially still remains unthought **Sociological Theory- Classical Statements** Dejerius Burgess,2019-06-04 The basic insight of sociology is that human behaviour is largely shaped by the groups to which people belong and by the social interaction that takes place within those groups The main focus of sociology is the group not the individual Sociologist is mainly interested in the interaction between people the ways in which people act towards respond to and influence one another Sociology does not however study everything that happens in society or under social conditions Classical Sociological Theory continues to include two historical chapters covering the early history of the field as well as its most recent developments These chapters give students an overview that allows them to put the work of each theorist in its historical social and political context This book offers students a handy overview of most of what they need to know about classical sociological theory **Post-Anarchism** Duane Rousselle,Süreyyya Evren,2011-02-04 Post anarchism has been of considerable importance in the discussions of radical intellectuals across the globe in the last decade In its most popular form it demonstrates a desire to blend the most promising aspects of traditional anarchist theory with developments in post structuralist and post modernist thought Post Anarchism A Reader includes the most comprehensive collection of essays about this emergent body of thought making it an essential and accessible resource for academics intellectuals activists and anarchists interested in radical philosophy Many of the chapters have been formative to the development of a distinctly post anarchist approach to politics aesthetics and philosophy Others respond to the so called post anarchist turn with caution and scepticism The book also includes original contributions from several of today s post anarchists inviting further debate and new ways of conceiving post anarchism across a number of disciplines Post-structuralist and Post-modernist Sociology Scott Lash,1991 This important volume prepared by a leading authority in the field presents those articles and excerpts that

have served as pivotal texts in the development of post structuralism and post modernism The book will be an essential reference point to an area of sociological theory that is attracting increasing attention **The Classical Review** ,1910

Classical and Modern Literature ,1994 **Bulletin of the Institute of Classical Studies of the University of London** ,1989 Staging of Classical Drama Around 2000 Pavlina N. Šipová,Alena Sarkissian,2007 Classical drama on the modern stage as a cultural and political phenomenon is scholarly trailed since the 1950s and 60s and intensified in the last third of the twentieth century The evidence is being extensively documented pioneered by Walton 1987 and McDonald 1992 and subsequently developed by collaborative research projects which include published databases It is clear from the work of these projects that performance of classical drama is a major feature in all types of theatre avant garde and experimental student international and fringe epic and classical commercial popular and canonical This means that it is closely intertwined with the politics of locale environment and geography as well as of language translation and culture Each of the essays has a specialised contribution to make However the total impact of the whole section will be even greater than the sum of the parts because the authors not only intersect in their discussions of common concerns in modern performance of ancient drama but also provide case studies that will add to the knowledge base and critical acumen of everyone working in the field
