Nelson W. Keith

Post Cartesian Meditations An Essay In Dialectical Phenomenology:

Post-Cartesian Meditations James L. Marsh, 1988 Although this book derives its inspiration from Descartes Meditations and Husserl's Cartesian Meditations it attempts to overcome Cartesianism conceived as individualistic reflective apodictic pre-suppositionless self-recovery

Phenomenology for the Twenty-First Century J. Aaron Simmons, J. Edward Hackett, 2016-10-19 This volume illustrates the relevance of phenomenology to a range of contemporary concerns Displaying both the epistemological rigor of classical phenomenology and the empirical analysis of more recent versions its chapters discuss a wide range of issues from justice and value to embodiment and affectivity The authors draw on analytic continental and pragmatic resources to demonstrate how phenomenology is an important resource for questions of personal existence and social life The book concludes by considering how the future of phenomenology relates to contemporary philosophy and related academic fields

Toward a Phenomenological Rhetoric Barbara Couture, 1998 Current rhetorical and critical theory for the most part separates writing from consciousness and presumes relative truth to be the only possible expressive goal for rhetoric These presumptions are reflected in our tradition of persuasive rhetoric which values writing that successfully argues one person's belief at the expense of another's Barbara Couture presents a case for a phenomenological rhetoric one that values and respects consciousness and selfhood and that restores to rhetoric the possibility of seeking an all-embracing truth through pacific and cooperative interaction Couture discusses the premises on which current interpretive theory has supported relative truth as the philosophical grounding for rhetoric premises she argues that have led to constraints on our notion of truth that divorce it from human experience She then shows how phenomenological philosophy might guide the theory and practice of rhetoric reanimating its role in the human enterprise of seeking a shared truth She proposes profession and altruism as two guiding metaphors for the phenomenological activity of truth seeking through interaction Among the contemporary rhetoricians and philosophers who influence Couture are Pierre Teilhard de Chardin Martin Buber Charles Altieri Charles Taylor Alasdair MacIntyre and Jürgen Habermas

Reading Descartes Otherwise Kyoo Lee, 2014-04-15 Focusing on the first four images of the Other mobilized in Descartes Meditations namely the blind the mad the dreamy and the bad Reading Descartes Otherwise casts light on what have heretofore been the phenomenological shadows of Cartesian rationality In doing so it discovers dynamic signs of spectral alterity lodged both at the core and on the edges of modern Cartesian subjectivity Calling for a Copernican reorientation of the very notion Cartesianism the book's series of close creatively critical readings of Descartes signature images brings the dramatic forces moments and scenes of the cogito into our own contemporary moment The author patiently unravels the knotted skeins of ambiguity that have been spun within philosophical modernity out of such clichés as Descartes the abstract modern subject and Descartes the father of modern philosophy a figure who is at once everywhere and nowhere In the process she revitalizes and reframes the legacy of Cartesian modernity in a way more mindful of its proto-phenomenological traces

Marx and Whitehead Anne Fairchild

Pomeroy,2012-02-01 Marx and Whitehead boldly asks us to reconsider capitalism not merely as an economic system but as a fundamentally self destructive mode that by its very nature and operation undermines the cohesive fabric of human existence Author Anne Fairchild Pomeroy asserts that it is impossible to appreciate fully the impact of Marx s critique of capitalism without understanding the philosophical system that underlies it Alfred North Whitehead s work is used to forge a systematic link between process philosophy and dialectical materialism via the category of production Whitehead s process thought brings Marx s philosophical vision into sharper focus This union provides the grounds for Pomeroy s claim that the heart of Marx s critique of capitalism is fundamentally ontological and that therefore the necessary condition for genuine human flourishing lies in overcoming the capitalist form of social relations

Outline of a New Liberalism Nelson W. Keith,2015-07-29 This book is revolutionary in intent and is in many ways quite an uncommon work It is iconoclastic as it goes about dislodging roots It attempts to release the stigmatized Other from entrapment by rationalism and modern liberalism The stigmatized Other are legendarily marginalized from congenial social relations with mainstream society They include peoples of color women gays and lesbians among others Entrapment through misrecognition is captured via marked contrasts existing between two major liberal configurations modern liberalism and pragmatism Accordingly the book is tasked with overcoming the systemic constraints placed upon the stigmatized Other to conform when such a demand runs disastrously counter to their inherently

irrefragable self definition Conformity is reductionist beholden to dyadic forms of thinking which impose a singular mathematically derived God s Eye View upon reality The difficulty here is that the imposed criteria for giving meaning value and purpose to human life have no place for what the stigmatized Other adopts On the other hand pragmatism of a particular stripe establishes a naturalistic instead of the mathematical basis for our understanding of human life Naturalism counsels that human beings should situate themselves directly in the midst of what constitutes their sense of life with experience providing the bases for all the related determinations Experience draws upon conditions of flux and uncertainty as the basis of human life To adhere to the God s Eye View is to make human beings into desiccated calculating machines This book is located in the heart of this tension Programmatically it deconstructs the rationalism modern liberalism combine and constructs its replacement in pragmatism complemented by phronesis as carriers of this alternative mode of thought Consequential change emerges a modern liberal world of fixity in social relations mathematically derived is displaced by one characterized by intersubjective relations where lived experience forms its scientific and philosophical bases The Ancients figure prominently in this book as it is shaped around the central idea that the emancipation of the stigmatized Other is occurring in the context of perhaps the first engagement between the Platonic and the Protagorean Sophistic confrontation which lies at the heart of early Greek thought

The Hastings Law Journal ,2008 Jürgen Habermas Martin Beck Matušík,Martin Joseph Matušík,2001 This philosophical political profile offers the first of its kind intellectual reconstruction of Habermas s defining existential and historical situations his generational profile and interventions his impact on as well as the discontents that his life work generates in others Written as a lively dramatic engagement with major themes of Habermas s adult life in postwar Germany the entire study occupies a unique place between the standard genres of a biography and a theoretical commentary on the oeuvre In this work the reader is taken on a journey with Habermas through the 20th century intellectual and political history from the defeat of Nazism to the Cold War restoration of the 50s the student movement of the 60s the historical revisions of the 70s and 80s the hope of the post Wall era after 1989 all the way to the controversies surrounding the allied wars of intervention against Iraq and Serbia in the 1990s Both beginning and advanced readers of 20th century socio political thought gain greater insight into the existential political and philosophical influences that proved to be formative of Habermas s writing and activism in the public sphere The first part of the study emphasizes the unfolding linear view of Habermas s postwar history punctuated by the major existential and political situations of his young adult life from 1945 to 2000 The second part returns to the same time span in order to reconstruct Habermas s mature post Wall intellectual profile in contrast to the profiles of the preceding generation of 1945 and the later protesting generation of 1968 The third part examines the tremendous Habermas effect exercised on 20th century thought and public policy The concluding chapters discuss critically the lasting place as well as the limits of Habermas s achievement in contribution to a development of new critical theory The book is enhanced by an introduction that provides a historical and

to the life and work of this politically engaged intellectual Part I examines Merquiorian thought itself and aptly enough

Merquior s favourite themes liberalism as it relates to social cohesion political stability morality republicanism and
democracy and the relativism and scepticism that characterize postmodern thinking The book s application to two regions of
the world is direct and obvious to Merquior s own Latin America and to Central and Eastern Europe where rapid political
change and economic transition have brought debates on liberalism to the forefront But in Merquior s thought there are also
lessons for Western Europe and the United States where the very familiarity of the liberal tradition can lead to a certain
sterility of ideas These various perspectives in liberal political thought are brilliantly drawn out by Ernest Gellner in the
