**Postclassic Soconusco Society** Barbara Voorhies, Janine Gasco, 2004 This timely report presents new archaeological data on Postclassic sites 11th through 16th centuries AD in one of the key regions of Mesoamerica The Pacific coast of Soconusco was at the forefront of cultural developments from the time of its earliest farmers in the Formative period through the Spanish conquest Yet until now the Postclassic archaeology of this region has remained poorly known This book presents the results of archaeological fieldwork at the political center Acapetahua and other key Postclassic sites in Soconusco by two leading Mesoamericanist archaeologists The authors analyses of artifacts shed light on subsistence activities the production of textiles and other craft items commercial exchange and the social context of life in this area The Late Postclassic period was a dynamic and innovative time when peoples from all parts of Mesoamerica were drawn together by processes of commercial and stylistic interaction Until recently however Postclassic archaeological data has been limited to a few areas Postclassic Soconusco Society now adds a key region to the overall picture This work will serve as both a basic reference on the Postclassic archaeology of a key region and a case study in the local impacts and manifestations of ancient empires and world systems

**Fire and Salt** Hector Neff, 2024-11-01 Fire and Salt traces the history of how human activities have helped build the littoral landscape of Pacific coastal southern Mesoamerica over the past five thousand years Evidence comes from airborne

lidar surface reconnaissance and excavation within the mangrove estuary zone sediment coring and a chronological framework encompassing nine ceramic complexes extending from Early Formative to Historic times In presenting the landscape as it exists today this volume also describes what may soon be lost The mangrove forests harbor a record of the human past a focus of the present volume but they also shield the coast from storms and tsunamis provide nurseries for commercially important marine species and store large amounts of carbon These threats may pale however in comparison to the imminent threat posed by sea level rise over the coming decades especially if worst case scenarios come to pass By inventorying resources including cultural resources this book makes a first step toward mitigating the effects of environmental degradation that appear all but unavoidable
