Postconviction DNA Testing U.s. Department of Justice, Office of Justice Programs, National Institute of Justice, 2012-07-18 In recent years technological progress in DNA deoxyribonucleic acid testing has made DNA evidence a predominant forensic technique for identifying criminals when biological tissues are left at a crime scene DNA testing on samples such as saliva skin blood hair or semen not only helps to convict but also serves to exonerate The sophisticated technology makes it possible to obtain conclusive results in cases in which previous testing had been inconclusive Postconviction testing will be requested not only in cases in which DNA testing was never done but also in cases in which the more refined technology may result in an indisputable answer It is hoped this report Postconviction DNA Testing Recommendations for Handling Requests will help participants through the postconviction process The report is the work of the Working Group on Postconviction Issues one of five working groups that report to the National Commission on the Future of DNA Evidence The suggestions are based on the group s consensus on how defense counsel prosecutors judicial officers victims advocates and DNA laboratories can respond effectively at the various stages of a postconviction request for DNA testing Cooperation on the part of law enforcement officials may be crucial materials needed for testing or retesting may be in their possession To properly implement the recommendations contained in this report participants in postconviction DNA proceedings need to consider the category of the case in which the DNA testing is sought and whether participants need to adjust the roles they customarily play in adversarial proceedings

**Post-conviction DNA Testing** United States. Congress. Senate. Committee on the Judiciary, 2001 Postconviction DNA Testing National Commission on the Future of DNA Evidence (National Institute of Justice), 1999 A report from National Commission on the Future of DNA Evidence Cover **Postconviction DNA Testing** National Commission of the Future on DNA Evidence (National Institute of Justice), 1999 Forensic Criminology Wayne Petherick, Brent E. Turvey, Claire E. Ferguson, 2009-07-30 Forensic Criminology gives students of criminology and criminal justice an introduction to the forensic realm and the applied forensic issues they will face when working cases within the justice system It effectively bridges the theoretical world of social criminology with the applied world of the criminal justice system While most of the competing textbooks on criminology adequately address the application and the social theory to the criminal justice system the vast majority do not include casework or real world issues that criminologists face This book focuses on navigating casework in forensic contexts by case working criminologists rather than broad social theory It also allows criminology criminal justice instructors outside of the forensic sciences the ability to develop and instruct a core course that might otherwise be considered beyond their expertise or in conflict with forensic courses taught in chemistry biology or medical programs at their institutions because of its focus on criminology and criminal justice careers With its practical approach this textbook is well suited for forensic criminology subjects being taught and developed in law criminology and criminal justice programs around the world Approaches the study of criminology from an applied standpoint

moving away from the purely theoretical Contains relevant and contemporary case examples to demonstrate the application of forensic criminology Provides an integrated philosophy with respect to criminology forensic casework criminal investigations and the law Useful for students and professionals in the area of criminology criminal justice criminal investigation forensic science and the law *Post-conviction DNA Testing* Ravindran Kunjan,2003 *Postconviction DNA Testing* National Commission of the Future on DNA Evidence (National Institute of Justice),1999 *Postconviction DNA Testing* ,1999 **Postconviction DNA Testing** Ronald Reinstein,2000-08 *Encyclopedia of DNA and the United States Criminal Justice System* Louis J.
