The background of the slide is a complex, abstract composition. It features a central circular element that resembles a clock face, with hands and tick marks, though the details are somewhat obscured by the blue overlay. Surrounding this central element are various geometric shapes, including triangles, squares, and lines, some of which are arranged in a grid-like pattern on the right side. The overall color palette is dominated by shades of blue, with some lighter, almost white, areas that create a sense of depth and movement.

Nursing Theory, Postmodernism, Post-structuralism, and Foucault Olga Petrovskaya, 2022-09-30 Nursing Theory Postmodernism Post structuralism and Foucault critiques mainstream American nursing theory and its use of post structural theory comparing and contrasting how postmodern and post structural ideas have been used fruitfully in nursing research and theorizing elsewhere In the late 1980s references to post structuralism and Michel Foucault started to appear in nursing journals Since then hundreds of nursing publications have cited postmodernism and key post structural ideas such as power knowledge discourse and de centring the human subject In Nursing Theory Postmodernism Post structuralism and Foucault Olga Petrovskaya argues that the application of these ideas is markedly different in American nursing theory scholarship compared to nursing theoretical scholarship generated outside the canon of unique nursing theory Analysing relevant literature from the late 1980s through 2010s she demonstrates this difference arguing that American nursing theory calcified into a matrix of dogmas built on logical positivism wary of borrowed theory and loyal to a unique nursing science Post structural ideas that fit the matrix such as criticism of medicine are sanctioned whereas ideas sceptical of humanistic agendas including those that challenge

American nursing theory are rendered meaningless In contrast other nurse scholars from Britain Australia Canada and what the author calls the American enclave group engaged with postmodern and post structural perspectives to enrich their research and invite readers to rethink nursing practice The book showcases examples of their intelligent creative theorizing Arguing that American nursing theory enervated nursing theorizing Petrovskaya calls for opening this matrix to theoretical and methodological creativity less rigid categories of scholarship and healthy self examination Making the case that post structural ideas are vital for nurses ability to critically reflect on their discipline and profession this is a necessary read for all those interested in nursing theory philosophy and praxis Chapter 1 of this book is available for free in PDF format as Open Access from the individual product page at www.routledge.com It has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Qualitative Research for Allied Health Professionals Linda Finlay, Claire Ballinger, 2006-03-31 This practical text addresses a gap in the literature by mapping the links between philosophy, research method, and practice in an accessible, readable way. It offers guidance to allied health professionals increasingly involved in research as the emphasis grows on evidence-based practice on how to engage in meaningful, good quality qualitative research. To help researchers take on this challenge, the book highlights some of the choices involved in carrying out qualitative research, offers a wide range of practical examples to show how different ways of doing qualitative research can be managed, critically examines a variety of qualitative research methodologies of particular interest to allied health professionals, clarifies the links between epistemology, methodology, and method. The book is structured in three parts. Part I sensitises readers to the complex issues which challenge qualitative researchers at the planning stage of their projects. In Part II, the challenge of using different methodologies is critically explored by fifteen authors who describe their individual research experiences. Part III examines the choices researchers make when they evaluate and present research.

Situational Analysis Adele E. Clarke, 2005-03-30 This book provides a detailed and comprehensive introduction to situational analysis of qualitative data. Adele E. Clarke personally created the situational analysis approach; no other book currently deals with it. She carefully situates herself and the situational analysis approach vis-à-vis other current approaches to grounded theory, specifically and to qualitative data analysis more generally. Situational analysis is unique in that it both uses and extends grounded theory: it employs established coding and memoing strategies while extending the method to include three new kinds of maps and analyses of the situation focused upon in one's research. This is also the first publication about using grounded theory with historical, visual, and discursive materials.
