Kramer, 2016-08-11 Kramer was one of the most visionary musical thinkers of the second half of the 20th century In his The Time of Music he approached the idea of the many different ways that time itself is articulated musically This book has become influential among composers theorists and aestheticians Now in his almost completed text written before his untimely death in 2004 he examines the concept of postmodernism in music Kramer created a series of markers by which we can identify postmodern works He suggests that the postmodern project actually creates a radically different relationship between the composer and listener Written with wit precision and at times playfully subverting traditional tropes to make a very serious point about this difference Postmodern Music Postmodern Listening leads us to a strongly grounded intellectual basis for stylistic description and an intuitive sensibility of what postmodernism in music entails Postmodern Music Postmodern Listening is an examination of how musical postmodernism is not just a style or movement but a fundamental shift in the relationship between composer and listener The result is a multifaceted and provocative look at a critical turning point in music history one whose implications we are only just beginning to understand

Postmodernism, Music and Cultural Theory David Bennett, 2009 Demonstrates how theories of postmodernism as incredulity toward grand narrative speak to musical history and aesthetics This book illustrates how music has figured centrally in poststructuralist theory and can itself open up fresh perspectives for reassessing that theory The Transformation of Musical Arts Education Hetta Potgieter, 2006 **Postmodern Philosophy and Law** Douglas E. Litowitz, 1997 The author presents a two tiered analysis that views postmodern legal thought as both a collective intellectual movement and as the work of particular theorists notably Friedrich Nietzsche Michel Foucault Jacques Derrida Francois Lyotard and Richard Rorty He concludes that even though postmodern thought does not give rise to a normative theory of

right that can be used as a framework for deciding cases it can focus attention on genealogy and discourse and can empower those who have been denied a voice in the legal system

Creations Sven Rune Havsteen, 2007 The meaning of the noun creation and the verb to create range from the traditional theological idea of God creating ex nihilo to a more recent sense of the process of artistic conception This collection of thirteen essays written by scholars of music literature the visual arts and theology explores the complicated relationship between medieval rituals and theology and the development of an idea of human artistic creation which came to the fore in the sixteenth century The volume concentrates on the period from the Carolingians to the Counter Reformation but also includes some twentieth century musicians Each essay is dedicated to a particular topic concerned with ritual or artistic beginnings inventions harmony and disharmony as well as representations or celebrations of creation Central themes include the interplay of the ideas of God as creator of God acting and recreating in medieval liturgy of God as artist the deus artifex of the Pythagorean cosmology which was occasionally referred to as recently as the early nineteenth century and finally of the homo creator a concept in which man reflected and eventually replaced God in his artistic creativity This book therefore features new significant individual contributions from a range of scholarly disciplines but taken as a whole it also constitutes a complex interdisciplinary study with large scale historical constructions
