Postmodern Visions Drawings Paintings And Models By Contemporary Architects:

Postmodern Visions Heinrich Klotz, Volker Fischer, 1984 **Drawing on Architecture** Jordan Kauffman, 2018-06-01

How architectural drawings emerged as aesthetic objects promoted by a network of galleries collectors and institutions and how this changed the understanding of architecture Prior to the 1970s buildings were commonly understood to be the goal of architectural practice architectural drawings were seen simply as a means to an end But just as the boundaries of architecture itself were shifting at the end of the twentieth century the perception of architectural drawings was also shifting they began to be seen as autonomous objects outside the process of building In *Drawing on Architecture* Jordan Kauffman offers an account of how architectural drawings promoted by a network of galleries and collectors exhibitions and events emerged as aesthetic objects and ultimately attained status as important cultural and historical artifacts and how this was both emblematic of changes in architecture and a catalyst for these changes Kauffman traces moments of critical importance to the evolution of the perception of architectural drawings beginning with exhibitions that featured architectural drawings displayed in ways that did not elucidate buildings but treated them as meaningful objects in their own right When architectural drawings were seen as having intrinsic value they became collectible and Kauffman chronicles early collectors galleries and sales He discusses three key exhibitions at the Leo Castelli Gallery in New York other galleries around the world that specialized in architectural drawings the founding of architecture museums that understood and collected drawings as important cultural and historical artifacts and the effect of the new significance of architectural drawings on architecture and architectural history *Drawing on* interviews with more than forty people directly involved with the events described and on extensive archival research Kauffman shows how architectural drawings became the driving force in architectural debate in an era of change *Approaches to Drawing in Architectural and Urban Design* Fabio

Colonnese, Nuno Grancho, Robin Schaeverbeke, 2024-04-04 Architects draw for a variety of purposes they draw to assimilate places and precedents to generate ideas to develop a concept into a consistent project in a team to communicate ideas and solutions to patrons and clients and to guide building contractors during the construction stages as well as to produce further elaborations in order to publish their project in a treatise a journal or their own portfolio Most importantly architects draw to think and to manage complexity in a visual way By taking into account innovative and interdisciplinary uses of architectural drawing in the design process both historical and current the collection of chapters and interviews in this book frames a new critical perspective and a uniquely contextual appreciation of drawing as a way to encourage spatial thinking and practice in architecture and urbanism The authors take the discussion to a new level of philosophical sophistication while also considering drawing in relation to a series of specific engagements with urban development planning and architecture

Irony and the Discourse of Modernity Ernst Behler, 2014-07-01 Behler discusses the current state of thought on modernity and postmodernity detailing the intellectual problems to be faced and examining the positions of such central

figures in the debate as Lyotard Habermas Rorty and Derrida He finds that beyond the limits of communication further discussion must be carried out through irony The historical rise of the concept of modernity is examined through discussions of the querelle des anciens et des modernes as a break with classical tradition and on the theoretical writings of de Stael the English romantics and the great German romantics Schlegel Hegel and Nietzsche The growth of the concept of irony from a formal rhetorical term to a mode of indirectness that comes to characterize thought and discourse generally is then examined from Plato and Socrates to Nietzsche who avoided the term irony but used it in his central concept of the mask

Transportable Environments 2 Robert Kronenburg, Joseph Lim, Wong Yunn Chii, 2003-09-02 This book explores aspects of the historical and theoretical basis for temporary and transportable environments and provides an insight into the wide range of functions that they are used for today the varied forms they take and the concerns and ideas for their future development Themes in the book range from wide ranging topical issues like the ecological implications of building to more focused investigations such as shelter after disaster The book will be of interest to both students and practising architects engineers and those involved in the creation of the built environment It will also be of value to those involved in areas of product design design history building component manufacture and urban design

Terms of Appropriation Amanda Reeser Lawrence, Ana Miljački, 2017-12-06 This collection focuses on how architectural material is transformed revised swallowed whole plagiarized or in any other way appropriated It charts new territory within this still unexplored yet highly topical area of study by establishing a shared vocabulary with which to discuss or contest the workings of appropriation as a vital and progressive aspect of architectural discourse Written by a group of rising scholars in the field of architectural history and criticism the chapters cover a range of architectural subjects that are linked in their investigations of how architects engage with their predecessors

Art & Design ,1986 *Sprache im technischen Zeitalter* ,1989 *Thomas Gordon Smith and the Rebirth of Classical Architecture* Richard John, 2001 For the past two decades Thomas Gordon Smith has played a central role in the revival of classicism in contemporary architecture in America His conviction in the enduring relevance of this tradition to contemporary life has resulted in buildings which in terms of materials and function are just as much a product of the modern world as a high tech office building but in addition to admirably fulfilling the job for which they were intended they also have the rare quality of engaging us intellectually This extensively illustrated monograph presents Thomas Gordon Smith's buildings and projects for the first time A biographical essay explores the polymathic range of his other activities including his influential role as an educator commentator on Vitruvius historian of the Greek Revival painter of frescoes and designer and collector of furniture
