Poverty, Health, and Ecosystems Paul Steele, Gonzalo Oviedo, David S. McCauley, 2007

**Conserving Biodiversity in Arid Regions** J. Lemons, Reginald Victor, Daniel Schaffer, 2003-07-31 On the eve of the World Summit for Sustainable Development WSSD held in autumn 2002 in Johannesburg South Africa United Nations Secretary General Kofi Annan recommended five specific areas as focal points of discussion for the global forum Water energy health agriculture and biodiversity In his address Towards a Sustainable Future delivered just four months before the WSSD Secretary General Annan contended that concrete progress in each of these areas often referred to by their acronym WEHAB would be key to improving the quality of life not only in the developing world but across the globe For most people I think it is fair to say that the inclusion of biodiversity in a list that focuses on basic human needs may not be self evident Water energy health and agriculture yes But why biodiversity The truth is that biodiversity is just as critical to global well being as water energy agriculture and health This is because biodiversity both drives and shapes nature s intricate and dynamic structure in an enduring form and force that enables both current and future generations to enjoy its bounty

Poverty and the Transition to a Market Economy in Mongolia Keith Griffin, 1995-07-13 This book contains an analysis of the economic problems encountered in Mongolia during the transition from a centrally planned to a market economy when poverty increased dramatically unemployment rose sharply health and education indicators deteriorated and the economic and social position of women declined Yet there is considerable potential in Mongolia for a broadly based acceleration of output particularly if priority is given to the nomadic livestock sector and to grass roots development at the provincial level The book contains many policy suggestions intended to promote growth and employment and to reduce poverty

**East Asia Integrates** Kathie Krumm, Homi Kharas, 2004-01-01 Emerging East Asian economies have seen their share of world exports more than triple during the past quarter century and intraregional trade has driven this growth Broad measures of development in East Asia have improved at the same headlong pace Why push further integration now Two economic events of historic proportions provide the context strategic thinking of development in the region following the East Asian financial crisis of 1997 98 and the accession of China to the World Trade Organization Policymakers interested in a stable prosperous region are concerned by mildly rising inequality within countries and a widening gap between richer economies and the poorest

economies Increasingly the development agenda in the region with its focus on growth jobs and social stability and the trade policy agenda with its focus on market access and competitiveness have become intertwined East Asian policymakers seek to develop a coherent set of economic policies that can deliver stability growth and regional integration Without attempting to be comprehensive East Asia Integrates offers fundamental strategies that promote cross border flows of trade along with domestic policies on logistics trade facilitation standards and institutions to maximize the impact of these flows on development and distribute the gains from trade widely As the authors demonstrate multilateral and regional trade initiatives must provide a compelling vision of how integration can deliver broadly shared growth and prosperity if they are to succeed In addition they must use the momentum offered by trade agreements to address the links between trade on the one hand and social stability poverty reduction and growth on the other

### **Nomadic Peoples and Human Rights**

Jérémie Gilbert,2014-03-26 Although nomadic peoples are scattered worldwide and have highly heterogeneous lifestyles they face similar threats to their mobile livelihood and survival Commonly nomadic peoples are facing pressure from the predominant sedentary world over mobility land rights water resources access to natural resources and migration routes Adding to these traditional problems rapid growth in the extractive industry and the need for the exploitation of the natural resources are putting new strains on nomadic lifestyles This book provides an innovative rights based approach to the issue of nomadism looking at issues including discrimination persecution freedom of movement land rights cultural and political rights and effective management of natural resources Jeremie Gilbert analyses the extent to which human rights law is able to provide protection for nomadic peoples to perpetuate their own way of life and culture The book questions whether the current human rights regime is able to protect nomadic peoples and highlights the lacuna that currently exists in international human rights law in relation to nomadic peoples It goes on to propose avenues for the development of specific rights for nomadic peoples offering a new reading on freedom of movement land rights and development in the context of nomadism
