associated with European welfare states Recently the topic has gained relevance as welfare state retrenchment and international competition in globalized economies has put increasing pressures on individuals and families This book provides explanations as to why in work poverty is high in certain countries and low in others Much of the present concern about the working poor has to do with recent changes in labour market policies in Europe However this book is not primarily about low pay Instead it questions whether gainful employment is sufficient to earn a living both for oneself and for one's family members There are however great differences between European countries This book argues that the incidence and structure of the working poor cannot be understood without a thorough understanding of each country's institutional context This includes the system of wage setting the level of decommodification provided by the social security system and the structure of families and households Combining cross country studies with in depth analyses from a national perspective the book reveals that in work poverty in Europe is a diverse multi faceted phenomenon occurring in equally diverse institutional economic and socio demographic settings With its rich detail and conclusions this genuinely comparative study will be of interest to academics and researchers of labour and welfare economics social policy and European studies as well as to policy advisers

The triumph of failed ideas in Europe — revisited** Steffen Lehndorff, 2014-04-01 This book is a follow up to the ETUI 2012 volume *The triumph of failed ideas* The focus of the book is the weight attributed to the different economic and social development paths in ten individual EU countries and their interaction with the austerity regime established at EU level which in fact is deepening the crisis rather than paving ways out of it The most dangerous implication of this policy approach is according to this study that it is driving countries apart misleadingly in the name of Europe hence the title of the book *divisive integration* The main message of the book is that a gradual recovery is possible only if there is a change of course in individual countries that then triggers reactions in the policies of other countries and perturbations at the EU level However these changes in individual countries is no longer feasible without a green light or at least toleration from the level of the European institutions
