Power And Influence An Introduction To International Relations:

Widening the World of International Relations Ersel Aydinli, Gonca Biltekin, 2018-07-11 Current international relations IR theories and approaches which are almost exclusively built in the West are alien to the non Western contexts that engender the most hard pressing problems of the world and ultimately unhelpful in understanding or addressing the needs surrounding these issues Our supposedly revolutionary new concepts and approaches remain largely insufficient in explaining what happens globally and in offering lessons for improvement This deficiency can only be addressed by building more relevant theories For theory to be relevant in accounting for contemporary international relations we argue it should not only apply to but also emanate from different corners of the current political universe In other words diversity and dialogue can only come about when periphery scholars do not just meta theorize but also theorize Aydinli and Biltekin propose a new form of theorizing through this collection of work one that effectively blends peripheral outlooks with theory production They call this form homegrown theorizing or original theorizing in the periphery about the periphery Arguing that disciplinary culture is oblivious to the diversity that might be achieved by theorizing based on indigenous ideas and or practices this book intends to highlight that potential showing diversity in the background of the authors because wherever one looks at the world from paints the picture that is being seen Therefore we bring together scholars from Eastern Europe to South Africa from Iran to Japan to cover the extant diversity in ideas This work will be essential reading for all students and scholars concerned with the future of international relations theory *Handbook of Indo-Pacific Studies* Barbara Kratiuk, Jeroen Van den Bosch, Aleksandra Jaskólska, Yoichiro Sato, 2023-03-08 This handbook explores the significance of the Indo Pacific in world politics It shows how the re emergence of the Indo Pacific in international relations has fundamentally changed the approach to politics economics and security The volume explores the themes related to trade politics and security for better understanding of the Indo Pacific and the repercussions of the region s emergence studies different security and political issues in the region military competition maritime governance strategic alliances and rivalries and international conflicts analyses various socio economic dimensions of the Indo Pacific such as political systems cultural and religious contexts and trade and financial systems examines the strategies of various states such as the United States Japan India and China and their approaches towards the Indo Pacific covers the role of middle powers and small states in detail Interdisciplinary in approach and with essays from authors from around the world this volume will be indispensable to scholars researchers and students in the fields of international relations politics and Asian studies *The Struggle for Recognition in International Relations* Michelle K. Murray, 2019 How established powers can facilitate the peaceful rise of new great powers is a perennial question of international relations and has gained increased salience with the emergence of China as an economic and military rival of the United States Highlighting the social dynamics of power transitions *The Struggle for Recognition in International Relations* offers a powerful new framework through which to understand important

historical cases of power transition and more recently the rise of China and how the United States can facilitate its peaceful rise

Digital International Relations Corneliu Bjola, Markus Kornprobst, 2023-11-03 This book analyses how digital transformation disrupts established patterns of world politics moving International Relations IR increasingly towards Digital International Relations This volume examines technological agential and ordering processes that explain this fundamental change The contributors trace how digital disruption changes the international world we live in ranging from security to economics from human rights advocacy to deep fakes and from diplomacy to international law The book makes two sets of contributions First it shows that the ongoing digital revolution profoundly changes every major dimension of international politics Second focusing on the interplay of technology agency and order it provides a framework for explaining these changes The book also provides a map for adjusting the study of international politics to studying International Relations making a case for upgrading augmenting and rewiring the discipline Theory follows practice in International Relations but if the discipline wants to be able to meaningfully analyse the present and come up with plausible scenarios for the future it must not lag too far behind major transformations of the world that it studies This book facilitates that theoretical journey This book will be of much interest to students of cyber politics politics and technology and International Relations
