Tulsa, OK - Pryor Rendering, www.PryorRendering.com, a new musical based on the novel of the same name by Tulsa born author Gary Reed, will play for four performances only at The Tulsa Performing Arts Center from October 13 – 15.

Pryor Rendering is a new musical set in 1960's rural America. Two teens, Charlie and Dewar, fall deeply in love and struggle to fit in. Born on the poor table of his grandfather's bar, Charlie is scorned by his mother, visits his absent father and is coddled by his grandpa's stable of hoodlars. **Pryor Rendering** is the story of love, family, loss and the moment you discover you are not alone. This unique Oklahoma inspired production united award-winning talent from across the state and beyond.

Pryor Rendering is a co-production between American Theatre Company (Tulsa), The Oklahoma City Repertory Theatre (CityRep) and Churchman, Schiro and Producer Sue Conover Marinello, in Association with the Weitzenhoffer School of Musical Theatre at the University of Oklahoma. Churchman is an Assistant Professor at the Weitzenhoffer School of Musical Theatre at the University of Oklahoma.

Pryor Rendering has been a project in the making for over four years with readings which have taken place in Norman, Oklahoma, Tulsa, Oklahoma City, San Francisco and New York City. Talent from Tulsa, OKC, NYC and beyond have helped to shape **Pryor Rendering** throughout its development.

Directed by Stephen Nachamie (Associate Director for the 2016 Tony® award winner *She Loves Me* and world premieres *Mr. Confidential* and *Forerunner* and 2016 Helen Hayes Award Winner for *A Chorus Line*), **Pryor Rendering** has music and lyrics by Frank G. Schiro, and a libretto by Shawn Churchman.

Pryor Rendering features Broadway veterans Stacey Logan (Sweet Smell of Success, Crazy For You), Terry Runnels (Joubert), Julie Johnson (Grand Prince's Caravan), and Rachel Colon (Jennifers).

Among them, the cast and creative team have been a part of more than 13 Broadway productions.

Two young actors, Tanner Rose and Mark Jammal (both from the Weitzenhoffer Musical Theatre Program at the University of Oklahoma), have been a part of the development of this new musical since last year. They will portray Charlie Hope and his first love, Dewar.

Pounding out the cast are: Rebecca Ashton, Kai Daly, Ben Hall, Scott Hynes, Jordan Jacobs, Michael Jones, Gray Randolph, and Jackie Smola with Garrett Langley as the young Charlie Hope. **Pryor Rendering** had musical direction by Mark Miller, sound design by Chance MacNeill, lighting design by Adam Chamberlin and costume design by Andy Wallace.

Co-producers American Theatre Company (Tulsa), with Managing Director and Sound Designer Richard Ellis, and The Oklahoma City Repertory Theatre (CityRep), with Founding Artistic Director Donald Jordan, along with Marinello, launched the world premiere production at the Oklahoma City Civic Center Music Hall on October 1. The production has one more weekend in Oklahoma City from Friday, October 7 through Sunday, October 9, before moving to Tulsa. The production will run four performances only in Tulsa Performing Arts Center's John H. Williams Theatre from Thursday, October 13 through Sunday, October 15.

Founded in 1970 by a group of University of Tulsa students, American Theatre Company has been a staple in the Tulsa arts community for over 45 years and has been awarded numerous theatrical and civic leadership awards, including this past season's TATE awards. ATC is a proud member of Theatre Communications Group, the national organization for nonprofit theaters. Oklahoma City Repertory Theatre (City Rep) is also a member of TCG and has produced 15 seasons of professional and award-winning productions.

"This is an extraordinary and uniquely Oklahoman experience," said producer Sue Conover Marinello. "It is unprecedented to have a new Oklahoma inspired musical, based on a novel written by a Tulsa-born author, with a libretto written by an Oklahoman, that has been developed by Oklahoma talent, premiere in two major Oklahoma cities. The support from community organizations like Oklahomans for Equality, Freedom Oklahoma, Other Options, Okernama Youth Project, OKC Pride, and many PFLAG chapters has been exciting and inspiring."

"We have been working on this show for several years and are thrilled to finally see a full production," Marinello added. "We hope everyone in Tulsa will come experience the music and joy that is **Pryor Rendering**."

Opening night with American Theatre Company in Tulsa is Thursday, October 13, 8:00PM. Performances will also be held Friday, October 14, 8:00PM; Saturday, October 15, 8:00PM; Sunday, October 15, 2:00PM (Talk Back Event). Optimal Design Procedure for Two-level Fractional Factorial Experiments Given Prior Information about Parameters

Steven M. Sidik, 1971 Any prior information an experimenter has should be incorporated into the design of further experiments Assume such information is expressed as probabilities that each parameter of the full factorial model is nonzero This report develops optimal design procedures by posing the experimental design problem as a finite decision problem Bays and mini max design strategies are then derived and their application illustrated The major computational step is the evaluation of all possible matchings of physical variables to the abstract variables of all potential designs The technique of telescoping sequences of blocks permits the consideration of experiments to be performed in stages **Computer**

Barthès, Junzhou Luo, 2008-12-18 Design of complex artifacts and systems requires the cooperation of multidisciplinary design teams using multiple sophisticated commercial and non commercial engineering tools such as CAD tools modeling simulation and optimization software engineering databases and knowledge based systems Individuals or individual groups of multidisciplinary design teams usually work in parallel and independently with various engineering tools which are located on different sites often for quite a long period of time At any moment individual members

may be working on different versions of a design or viewing the design from various perspectives at different levels of details. In order to meet these requirements it is necessary to have efficient computer supported collaborative design systems. These systems should not only automate individual tasks in the manner of traditional computer aided engineering tools but also enable individual members to share information, collaborate and coordinate their activities within the context of a design project. Based on close international collaboration between the University of Technology of Compiègne in France and the Institute of Computing Technology of the Chinese Academy of Sciences in the early 1990s, a series of international workshops on CSCW in Design started in 1996. In order to facilitate the organization of these workshops, an International Working Group on CSCW in Design (CSCWD) was established and an International Steering Committee was formed in 1998. The series was converted to international conferences in 2000, building on the success of the four previous workshops.

Intellectual property law and practice in China has changed dramatically since the first edition of this influential book published in 2005. Today, judicial and administrative application of law plays a major role and accordingly this entirely rewritten new edition draws on an abundance of court and administrative decisions clarifying how the law is applied. In a thorough and systematic manner, the authors clearly demonstrate the sophisticated level of legal certainty available for domestic and foreign entities doing business in China, including the adaptation of the legal framework to new technologies, broadened scope of protected subject matter, improved quality of filings and significant enhancement of enforcement, not only with regard to remedies but also to procedural aspects. Providing comprehensive coverage of all aspects of intellectual property protection in China, including analysis of IP related provisions of China's new Civil Code, the book emphasizes issues of concern to foreign traders and investors such as the following: copyright law and software protection; protection of trademarks, including Chinese character and Roman script trademarks, well known marks and bad faith applications; technology transfer; enforcement of trade secret and patent protection; criminal liability for infringement; unfair competition and antitrust law; role of the binding interpretations of the Supreme People's Court; administrative regulations that supplement the laws; co-operation with administrative authorities; protection of geographical indications; protection of trade names; domain name dispute resolution; special patent related laws protecting such areas as plant varieties, integrated circuit layout designs and relevant provisions of the distinct laws of Hong Kong and Macao. Full descriptions of the competencies of China's IP related institutions are included with detailed attention to procedural matters. Brief historical notes in each chapter feature the most significant changes in each amendment of law and regulation. Because in China the laws are supplemented and interpreted by numerous guidelines and circulars issued by ministries or courts, the up to date knowledge and awareness provided in this new edition

is essential for all companies investing in China or considering such investment as well as for practitioners counselling their clients on strategies In addition officials and policymakers involved in trade or other relations with China will benefit from a comprehensive update of what the current law is and a critical view of what the challenges are the 2021 IPLCN is a recommended read for those who seek a well written English textbook which covers the main principles of Chinese IP Law Clearly outlined it is probably one of the best of its kind on the market Its existence is welcome and necessary in the current era where languages are still obstacles By Tian Lu Book Review for The IP Kitten September 2021 *Contemporary Experimental Design, Multivariate Analysis and Data Mining* Jianqing Fan,Jianxin Pan,2020-05-22 The collection and analysis of data play an important role in many fields of science and technology such as computational biology quantitative finance information engineering machine learning neuroscience medicine and the social sciences Especially in the era of big data researchers can easily collect data characterised by massive dimensions and complexity In celebration of Professor Kai Tai Fang s 80th birthday we present this book which furthers new and exciting developments in modern statistical theories methods and applications The book features four review papers on Professor Fang s numerous contributions to the fields of experimental design multivariate analysis data mining and education It also contains twenty research articles contributed by prominent and active figures in their fields The articles cover a wide range of important topics such as experimental design multivariate analysis data mining hypothesis testing and statistical models **The Architect** ,1889 **Official Gazette of the United States Patent Office** USA Patent Office,1899 **Reports of Patent, Design, Trade Mark and Other Cases** ,1888 Calendar of Inquisitions Post Mortem and Other Analogous Documents Preserved in the Public Record Office: Edward I Great Britain.
