Rem Koolhaas Conversations With Students:

Rem Koolhaas: Rem Koolhaas, Sanford Kwinter, Rice University. School of Architecture, 1996-03 Explaining architecture to students requires a clarity and economy of expression that is not always associated with architects perhaps this explains the popularity of our Conversations with Students series which are succinct informal introductions to the works of the world's greatest architects **Rem Koolhaas** Rem Koolhaas, Lynn Fitzpatrick, Doug Hofius, 1991 Hotel Lobbies and Lounges

Tom Avermaete, Anne Massey, 2013-01-25 This series investigates the historical theoretical and practical aspects of interiors The volumes in the Interior Architecture series can be used as handbooks for the practitioner and as a critical introduction to the history of material culture and architecture Hotels occupy a particular place in popular imagination As a place of exclusive sociability and bohemian misery a site of crime and murder and as a hiding place for illicit liaison the hotel has embodied the dynamism of the metropolis since the eighteenth century This book explores the architectural significance of hotels throughout history and how their material construction has reflected and facilitated the social and cultural practices for which they are renowned Contemporary developments in the planning and design of hotels are addressed through a series of interviews and case studies Illustrated throughout this book is an innovative and important contribution to architectural and interior design theory literature *The Contested Territory of Architectural Theory* Elie G.

Haddad, 2022-10-21 This book brings together a diverse group of theoreticians to explore architectural theory as a discipline assessing its condition and relevance to contemporary practice Offering critical assessment in the face of major social and environmental issues of today 17 original contributions address the relevance of architectural theory in the contemporary world from various perspectives including but not limited to politics gender representation race environmental crisis and history The chapters are grouped into two distinct sections the first section explores various historical perspectives on architectural theory mapping theory's historiographical turn and its emergence and decline from the 1960s to the present the second offers alternative visions and new directions for architectural theory incorporating feminist and human rights perspectives and addressing contemporary issues such as Artificial Intelligence and the Age of Acceleration This edited collection features contributions from renowned scholars as well as emergent voices with a Foreword by David

Leatherbarrow This book will be of great interest to graduate and upper level students of architecture as well as academics and practicing architects **Utopias and Architecture** Nathaniel Coleman, 2007-05-07 Utopian thought though commonly characterized as projecting a future without a past depends on golden models for re-invention of what is Through a detailed and innovative re-assessment of the work of three architects who sought to represent a utopian content in their work and a consideration of the thoughts of a range of leading writers Coleman offers the reader a unique perspective of idealism in architectural design With unparalleled depth and focus of vision on the work of Le Corbusier Louis I Kahn and Aldo van Eyck this book persuasively challenges predominant assumptions in current architectural discourse forging a new approach to the

invention of welcoming built environments and transcending the limitations of both the postmodern and hyper modern stance and orthodox modernist architecture Take One Building : Interdisciplinary Research Perspectives of the Seattle Central Library Ruth Conroy Dalton, Christoph Hölscher, 2016-11-25 This book evaluates how we experience and understand buildings in different ways depending upon our academic and professional background With reference to Rem Koolhaas Seattle Central Library the book illustrates a range of different methods available through its application to the building By seeing such a variety of different research methods applied to one setting it provides the opportunity for researchers to understand how tools can highlight various aspects of a building and how those different methods can augment or complement each other Unique to this book are contributions from internationally renowned academics from fields including architecture ethnography architectural criticism phenomenology sociology environmental psychology and cognitive science all of which are united by a single real world application the Seattle Central Library This book will be of interest to architects and students of architecture as well as disciplines such as ethnography sociology environmental psychology and cognitive science that have an interest in applying research methods to the built environment A + U, architecture and urbanism ,2001 **Rem Koolhaas** Rem Koolhaas, 1991 Thresholds ,1998 **Rem Koolhaas, OMA + AMO / Spaces for Prada** Rem Koolhaas, 2021 Source Books in Architecture No 14 Rem Koolhaas OMA AMO Spaces for Prada is the most recent volume in the Source Books in Architecture series Among the topics discussed in the book are the long standing relationship with Prada and how the early objectives in that relationship have both maintained and shifted An underlying theme to the conversations held with students and faculty of the Knowlton School community is the topic of architect client relationships their history their problems and how they have contributed to the discipline over time Explicitly a focus of the conversation is a number of projects that OMA has developed or completed with Prada a large number of which are installation scale environments that manifest in the form of runway shows and exhibitions The challenge of such projects is to retain a commitment to the political and cultural agenda that OMA embeds in the larger and permanent buildings Given the ephemerality and role of these environments as literal backgrounds to highlighted events the projects are ideal scenarios in which to develop an architecture that lacks the permanence of buildings while still carrying potency and contributing to larger cultural discussions involving for example event place concept product staging the crowd lighting and materiality Source Books in Architecture No 14 contains project documentation from the OMA and Prada archives transcripts from Koolhaas conversations with students at the Knowlton School at The Ohio State University and commentary and critique from architects critics and theorists **Urban research, biopsy, and density** Jörg Seifert, 2003 **Contemporary Architects of the Low Countries** Hans Ibelings, Francis Strauven, 2000 **Everything Must Move** Luke Bulman, Jessica Young, Thumb (Firm), 2009 Includes a list of graduates faculty and staff with list of their awards publications and thesis titles 1994 2009 Urbane Topologie Joachim Huber, 2002 Design Book Review ,1993 **Rem Koolhaas** ,2003 **The Things**
