Interpreting textual mediations of history in early modernity this volume adds nuance to our understanding of the contributions fiction and fictionalizing make to the shape and texture of versions of and debates about history during that period Geographically the scope of the essays extends beyond Europe and England to include Asia and Africa Contributors take a number of different approaches to understand the relationship between history fiction and broader themes in early modern culture They analyze the ways fiction writers use historical sources fictional texts translate ideas about the past into a vernacular accessible to broad audiences fictional depictions and interpretations shape historical action and the ways in which nonfictional texts and accounts were given fictional histories of their own intentionally or not through transmission and interpretation By combining the already contested idea of fiction with performance action and ideas ideology this collection provides a more thorough consideration of fictional histories in the early modern period It also covers more than two centuries of primary material providing a longer perspective on the changing and complex role of history in forming early modern national gendered and cultural identities

Rebirth, Reform, and Resilience James M. Kittelson, Pamela J. Transue, 1984 **Challenges to Authority** Peter Elmer, 2000-01-01

The evolution and reception of the Renaissance was mediated by developments in various other spheres of early modern life and culture Foremost among these were the religious changes initiated by the Protestant Reformation which are discussed in the opening chapters of this book Religious and cultural developments in Germany are contrasted with sixteenth century Spain and are further explored through the study of the picaresque novel *Lazarillo de Tormes* The place of Renaissance science or natural philosophy is also the subject of critical evaluation in this book Case studies on the anatomical revolution Galileo and court patronage and Paracelsus illustrate new approaches in the field Subsequent chapters explore the Renaissance fascination with witchcraft and demonology in both learned discourse Pico's *Strix* and popular drama *The Witch of Edmonton* The volume concludes with a study of one of the most influential and provocative writers of the sixteenth century Michel de Montaigne whose *Essays* provide stimulating material for a reassessment of the impact of the Renaissance on contemporary thought This volume is the third in a series of three texts designed for the Open University course *The Renaissance in Europe A Cultural Enquiry*

The Church in the Early Modern Age C. Scott Dixon, 2016-03-24 The years 1450 1650 were a momentous period for the development of Christianity They witnessed the age of Reformation and Counter Reformation perhaps the most important era for the shaping of the faith since its foundation C Scott Dixon explores how the ideas that went into the making of early modern Christianity re oriented the Church to such an extent that they gave rise to new versions of the religion He shows how the varieties and ambivalences of late medieval theology were now replaced by dogmatic certainties where the institutions of Christian churches became more effective and modern staffed by well trained clergy Tracing these changes from the fall of Constantinople to the end of the Thirty Years War and treating the High Renaissance and the Reformation as part of the same overall narrative the author offers an integrated approach to widely different national social and cultural histories Moving beyond Protestant and Catholic conflicts he contrasts Western Christianity with Eastern Orthodoxy and examines the Church s response to fears of Ottoman domination Later Medieval Europe Daniel Waley, Peter Denley, 2013-11-26 From the divine right of kings to the political philosophies of writers such as Machiavelli the medieval city states to the unification of Spain Daniel Waley and Peter Denley focus on the growing power of the state to illuminate changing political ideas in Europe between the thirteenth and sixteenth centuries Spanning the entire continent and beyond and using contemporary voices wherever possible the authors include substantial sections on economics religion and art and how developments in these areas fed into and were influenced by the transformation of political thinking The new edition takes the narrative beyond the confines of western Europe with chapters on East Central Europe and the teutonic knights and the Portuguese expansion across the Atlantic The third edition of this classic introduction to the period includes even greater use of contemporary voices full reading lists and new chapters on East Central Europe and Portuguese exploration Suitable as an introductory text for undergraduate courses in Medieval Studies and Medieval European History **History of Civilization, Vol. 1** Robin W. Winks, Crane Brinton, Robert L. Wolff, 1992 **Pamphlets and Politics in the Dutch Republic** Femke Deen, David Onnekink, Michel Reinders, 2010-12-17 This volume explores the relationship between politics and pamphleteering in the Dutch Republic By analyzing the political role of pamphlets and their interplay with other media in public debates the articles provide a new understanding of Dutch political culture **A History of Architecture in All Countries from the Earliest Times to the Present Day** James Fergusson, 1873 **American Architect and the Architectural Review** , 1894 The American Architect and Building News , 1891
