mal als neurotisch bedrohlich oder aber auch als außergewöhnlich begabt wahrgenommen. In diesem Buch erfolgt zunächst eine Annäherung an einstige Weltbilder und Rituale der Schamanen Sibiriens. Schließlich wird gezeigt, was diese auch heute noch für uns und für indigene Gemeinschaften bedeuten können, deren Teil ihres Kulturerbes sie sind. Damit richtet sich der Blick auf das Vermächtnis der Schamanen, deren Wissen und Faszination in Wissenschaft und Kunst weit über Sibirien hinaus gewirkt haben und uns auch weiterhin in ihren Bann ziehen werden, in einem Ausmaß, wie es für sie selbst in ihren Visionen seinerzeit wohl kaum vorstellbar war.

Religion and Magic in Socialist and Post-Socialist Contexts Alexandra Cotofana, James M. Nyce, 2017-03-28. Religion and magic have played important roles within Eastern European societies where social reality and socio-political balance may differ greatly from those in the West. Although often thought of as being two distinct even antagonistic forces, religion and magic find ways to work together. By taking on various examples in the multicultural settings of post-Soviet and post-socialist spaces, this collection brings together diverse historical and ethnographic analyses of orthodoxy and heterodoxy from the pre and post 1989 periods, studies on the relationship of religious and state institutions to individuals practicing alternative forms of spirituality, and examples of borderlands as spaces of ambiguity. This volume is at the crossroads of anthropology, history, as well as cultural memory studies. Its archival and field research findings help understand how repurposing religious and magic practices worked into the transition that countries in Eastern Europe and beyond have experienced after the end of the Cold War.

The Life of a Galilean Shaman Pieter F. Craffert, 2008-01-01. Historical Jesus research remains trapped in the positivistic historiographical framework from which it emerged more than a hundred and fifty years ago. This is confirmed by the nested assumptions shared by the majority of researchers. These include the idea that a historical figure could not have been like the Gospel portrayals and consequently the Gospels have developed in a linear and layered fashion from the authentic kernels to the elaborated literary constructions as they are known today. The aim of historical Jesus research therefore is to identify the authentic material from which the historical figure as a social type underneath the overlay is constructed. Anthropological historiography offers an alternative framework for dealing with Jesus of Nazareth as a social personage fully embedded in a first-century Mediterranean worldview and the Gospels as cultural artifacts related to this figure. The shamanic complex can account for the cultural processes and dynamics related to his social personage. This cross-cultural model represents a religious pattern that refers to a family of features for describing those religious entrepreneurs who, based on regular Altered States of Consciousness experiences, perform a specific set of social functions in their communities. This model accounts for the wide spectrum of the data ascribed to Jesus of Nazareth while it offers a coherent framework for constructing the historical Jesus as a social personage embedded in his worldview. As a Galilean shamanic figure, Jesus typically performed healings and exorcisms, he controlled the spirits, while he also acted as prophet, teacher, and mediator of divine knowledge.

Working with Rock Art Benjamin Smith, Knut Helskog, David Morris, 2012-12-01. Cutting edge contributions that consider new

approaches to the documentation of rock art its interpretation using indigenous knowledge and the presentation of rock art This volume contains contributions that consider new approaches to three areas the documentation of rock art its interpretation using indigenous knowledge and the presentation of rock art Working with Rock Art is the first edited volume to consider each of these areas in a theoretical rather than a technical fashion and it therefore makes a significant contribution to the discipline The volume aims to promote the sharing of new experiences between leading researchers in the field While the geographic focus is truly global there is a dominant north south axis with strong representation from researchers in southern Africa and northern Europe two leading centres for new approaches in rock art research Working with Rock Art opens up a long overdue dialogue about shared experiences between these two centres and a number of the chapters are the first published results of new collaborative research Since this volume covers the recording interpretation and presentation of rock art it will attract a wide audience of researchers heritage managers and students as well as anyone interested in the field of rock art studies
