Pattern and Person Martin J. Powers, 2020-03-17 In Classical China crafted artifacts offered a material substrate for abstract thought as graphic paradigms for social relationships Focusing on the fifth to second centuries B C Martin Powers explores how these paradigms continued to inform social thought long after the material substrate had been abandoned In this detailed study the author makes the claim that artifacts are never neutral as a distinctive possession each object through the abstracting function of style offers a material template for scales of value Likewise through style pictorial forms can make claims about material referents the things depicted By manipulating these scales and their referents artifacts can shape the way status social role or identity is understood and enforced The result is a kind of spatial epistemology within which the identities of persons are constructed Powers thereby posits a relationship between art and society that operates at a level deeper than iconography attributes or social institutions Historically Pattern and Person traces the evolution of personhood in China from a condition of hereditary status to one of achieved social role and greater personal choice This latter development essential for bureaucratic organization and individual achievement challenges the conventional opposition between Western individuals and collective Asians

All Things Act Assistant Professor of Philosophy Mercedes Valmisa, Mercedes Valmisa, 2025 This book explores the collective character of action to expand the ways we think about agency First it resists viewing agency as a capacity much less one exclusive to humans Instead it defines agency as an umbrella term for the concrete sociomaterial processes that emerge from the collaborative efforts of multiple entities acting together Agency isn't the faculty of an individual entity or self it's always the function of a network or assembly of actors Second many of the actors involved in these processes are nonhuman things without intentions will or even awareness This relational and collective approach adopts a conception of action that doesn't hinge on mental states To act is to participate in contribute to shape facilitate organize constrain and modify the course of events This book argues that there's no such thing as an individual action and that agency is collectively distributed across a heterogeneous field of human and nonhuman actors Provided by publisher

Eastern Zhou Ritual Bronzes from the Arthur M. Sackler Collections Jenny F. So, 1995 The supreme art form of ancient China was the bronze ritual vessel Kings and nobles offered food and drink to their ancestors in spectacular cast bronze containers which served to advertise the owner's wealth and power no less than his piety Many of the bronzes eventually found their way into the tombs of their owners where they lay undisturbed for centuries or millennia until accidental discovery or the archaeologist's spade brought them once more to light The vast collection of

Chinese bronzes formed by the late Dr Arthur M Sackler ranges over the entire Bronze Age The bronzes of the Eastern Zhou period 8th to 3rd century BC are the subject of this third and concluding volume of the comprehensive catalogue of the collection In a thorough and up to date introduction Dr Jenny So Assistant Curator of Ancient Chinese Art at the Arthur M Sackler Gallery Smithsonian Institution gives a detailed account of the history of Eastern Zhou bronzes Particularly valuable is Dr So s systematic use of the latest archaeological discoveries to trace regional and chronological developments and to study the political context in which bronzes were made and used An especially valuable supplement to the volume is a major study of bronze bells coauthored by an archaeologist and an acoustical physicist Professor Lothar von Falkenhausen of UCLA and Professor Thomas D Rossing of Northern Illinois University The Sackler Collection includes twenty one bells which were employed in the same offering rituals as the bronze vessels Ninety color plates provide full documentation of the Sackler bronzes and over 560 black and white comparative illustrations help to set them in the context provided by archaeological research Scholarly appendices report elemental composition data on the bronze alloys lead isotope ratios and thermoluminescence dating tests of clay core material
