setting volume *New Economic Spaces in Asian Cities* draws on stimulating research conducted by a new generation of urban scholars to generate critical analysis and theoretical insights on the New Economy phenomenon within Asia. New industry formation and the transformation of older economic practices constitute instruments of development as well as signifiers of larger processes of change expressed in the reproduction of space in the city. Asia's major cities become the key staging areas for the New Economy driven by the growing wealth of an urban middle and professional class, higher education institutions, city-based inter-regional movements and urban mega projects. *New Economic Spaces in Asian Cities* animates this New Economy discourse by means of vibrant storylines of instructive cities and sites including case studies situated in cities such as Tokyo, Seoul, Shanghai, Beijing, Shenzhen and Singapore. Theoretical and normative issues associated with the emergence of the new cultural economy are the subject of the book's context-setting chapters and each case study presents an evocative narrative of development interdependencies and exemplary outcomes on the ground. *New Economic Spaces in Asian Cities* offers a vivid contribution to our understanding of the ongoing transformation of Asia's urban system including the critical intersections of global and local regional dynamics in processes of new industry formation and the relayering of space in the Asian metropolis. The synthesis of empirical profiles, normative insights and theoretical reference points enhances the book's interest for scholars and students in fields of Asian studies, urban and cultural studies and urban and economic geography as well as for policy specialists and urban community planners.

Intellectual Discourse in Reform Era China Giorgio Strafella, 2016-11-18 This book explores intellectual discourse in reform era China by analysing the so-called debate on the spirit of the Humanities which occurred in the years 1993-95 and which is recognised by scholars as one of the most interesting influential and important debates of the 1990s. This debate in which Chinese intellectuals reflected on reform era mass culture and on their role in society was the first debate in China after the crackdown of 1989 and the launch of new economic reforms after Deng Xiaoping's 1992 southern tour. The book drawing on a large corpus of texts and a wide range of individual positions demonstrates how Chinese intellectuals having to face the combination of political repression and economic liberalisation conceptualised and reacted to both. The book reveals the scale and complexity of the debate, the nature of intellectual life in China, the status and relevance of intellectual voices in society, the divisions within the intellectual sphere as well as shared concepts and ideals and how the key factors of political repression and economic liberalisation which remain central in China today were defined and articulated.

Planning World Cities Peter Newman, Andy Thornley, 2011-06-21 This major comparative text on urban planning and the global and regional context in which it takes place examines what have been traditionally regarded as world cities New York, London, Tokyo and also a range of other important cities in America, Europe and Asia. The authors show the role planning has played in the way cities have responded to the forces of globalization and argue for the importance of diverse rather than one-size-fits-all planning practices. This fully revised second edition systematically brings the debates on the impact of globalization right up to date and provides

integrated coverage of the latest planning theory and practice It also contains extended analysis of the implications of the rapid growth of Chinese cities such as Shanghai Hong Kong and Beijing New material is included on the impact of globalization on poorer mega cities like Mumbai and Johannesburg

Mega Urban Projects in China Yanpeng Jiang, 2022-11-14 This book is the first systematic account of mega urban projects in China covering their construction operation and planning It is a detailed examination of the planning and construction of Hongqiao and its impact on local residents In short the aim of this book is to examine the process of planning and development of the Hongqiao transportation and commercial zone to explore its relationship to urban development and spatial restructuring in Shanghai and in doing so to comment on and critique the nature of urban change in contemporary China which is characterized as property and infrastructure driven Mega urban projects are arguably the quintessential symbol of entrepreneurial urbanism and it is no coincidence that they have become a familiar part of the urban scene throughout the world not least in East Asia They can be seen as both a consequence of and a response to the deindustrialization of leading cities first in North America and Europe and then in East Asia as economies transitioned to globalized neoliberalism This book provides a comprehensive overview of the main features of the land based urban growth coalition formed in Hongqiao by introducing the detailed picture of the Hongqiao project and it outlines the recent example of the competitive rush to urban projects in China's largest cities that has led to the proliferation of new financial districts in Beijing and Guangzhou
