Guardians of the Peaks Kathy Calvert, Katherine M. Calvert, Dale Portman, 2006 Mountain rescue in western Canada developed through the Canadian Pacific Railway's use of Swiss guides to enhance the climbing experience in the early 1900s. These guides brought their knowledge of mountain rescue to the Canadian Rockies. As climbing gained in popularity with the emerging middle classes after the Second World War, tragic accidents became more common. Two accidents in 1954—the deaths of a group of female climbers from Mexico on Mt Victoria and a group of Philadelphia schoolboys on Mt Temple—forced the government to develop a professional mountain rescue team through the Park Warden Service under the tutelage of Walter Perren, a Swiss guide and the father of mountain rescue in Canada. Perren essentially turned cowboys into competent rescue personnel, and the story takes off from there. Following five principal men through the first 50 years of mountain rescue in Canada, *Guardians of the Peaks* also looks at all aspects of the rescue experience. It is the story of personal tragedy and the ability of individuals to cope with this stress-laced, demanding occupation. *Cincinnati Magazine*, 1993-01

School Health Education in Changing Times Deana Leahy, Lisette Burrows, Louise McCuaig, Jan Wright, Dawn Penney, 2015-09-16 This book explores the complex nexus of discourses, principles, and practices within which educators mobilise school-based health education. Through an interrogation of the ideas informing particular models and approaches to health education, the authors provide critical insights into the principles and practices underpinning approaches to health education, policy, curriculum, pedagogy, and assessment. Drawing on extensive literature and research, the book explores and considers what health education can and should do. Chapters examine the extent to which health education past and present has attended to the needs and interests of young people in school environments, as well as assess common pedagogical approaches and whether the outcomes tally with expectations. By considering the problems in teaching health education, curriculum, making health education pedagogies, and porous classrooms, the book offers a knowledge base from which educators can consider how theories and models can sit together to shape curriculum and influence practice. *School Health Education in Changing Times* will be of key interest to postgraduate students, researchers, and academics in the field of health education. It will also be a valuable resource for teacher educators, current teachers, and those on professional development courses who want to navigate the moral minefield surrounding health education.
