*Shaping Genes; Ethics, Law and Science of Using Genetic Technology in Medicine and Agriculture* Macer, D. R. J., 1990

**Shaping Genes; Ethics, Law and Science of Using Genetic Technology in Medicine and Agriculture** Macer, D. R. J., 1990     Recht und Bioethik Tade Matthias Spranger, 2010 English summary Although comprehensive codification processes pertaining to the life sciences have only been in existence for about twenty years a tight network of regulations has already been created The fact that the matters to be regulated have to be discussed both from a legal and a bioethical point of view can often be seen in the results of the regulation processes Thus the law is confronted with particular challenges in trying to regulate the potential applications of biomedicine and biotechnology Using numerous national European and international examples the author scrutinizes the role which is or may be assigned to bioethical principles and considerations in legislation and case law German description Obwohl umfassendere Kodifizierungsprozesse zu den Lebenswissenschaften erst seit etwa zwanzig Jahren zu registrieren sind wurde in dieser vergleichsweise kurzen Zeit bereits ein dichtes Netz spezifischer Regulierungen geschaffen Dabei lässt sich der Umstand dass die jeweiligen Regelungsgegenstände sowohl unter rechtlichen als auch unter bioethischen Gesichtspunkten Gegenstand der Diskussion sind häufig auch im Ergebnis des Regulierungsprozesses ablesen Bioethische Prinzipien entfalten so nicht mehr nur normitiiierende oder normkonkretisierende sondern auch unmittelbar positivrechtliche Effekte Risiken ergeben sich hieraus für den Normunterworfenen oder Anwender aber auch hinsichtlich einer möglichen Instrumentalisierung ethischer Reflexion Vor diesem Hintergrund befasst sich Tade Matthias Spranger mit dem Begriff der Bioethik im Kontext nationaler europäischer und internationaler Rechtssetzung und Rechtsprechung und unterzieht diese einer kritischen Bewertung     **Shaping Genes: Ethics, Law and Science of Using New Genetic Technology in Medicine and Agriculture** , Features Shaping Genes Ethics Law and Science of Using New Genetic Technology in Medicine and Agriculture a research paper written by Darryl R J Macer of the Eubios Ethics Institute that was originally published in 1990 and is presented online by the author Discusses new genetic and reproductive techniques in medicine together with the use of genetic engineering for nonhuman applications     Genetics and Gene Therapy Sheila A.M. McLean, 2017-09-08 Genetics and Gene Therapy shows the wide range of the debate and the very real significance that genetics and its associated developments have for human beings individually and collectively Few areas of science and medicine have resulted in the volume of academic and popular literature as has genetics The so called revolution in understanding of the causes of disease states and even behavioural traits has focussed public attention on the influence of genes in making us what we are Rapidly however the potential benefits of such understanding were overtaken in the public mind at least by the question of the possible negative implications of genetic knowledge and associated technologies The chapters in this volume show just how wide ranging concern has become ranging from regulation to cloning with the fear of discrimination in between Part One begins with a

range of general discussions of about the genetic enterprise itself followed by consideration of some specific questions Part Two then addresses cutting edge debates in genetics     Interdisciplinary Approaches to Gene Therapy Stefan Müller,Jürgen W. Simon,Jan W. Vesting,2012-12-06 Current therapies for most human genetic diseases are inadequate In response to the need for effective treatments modern molecular genetics is providing tools for an unprecedented new approach to the treatment of diseases e g the direct manipulation of mutant genes or the input on new therapeutic genes The treatment of human disease by gene transfer has now moved from the theoretical to the practical realm With the initiation of clinical trials involving somatic gene therapy in different countries a critical assessment of the different aspects involved with this new technique is necessary This volume provides an overview on all these interdisciplinary aspects by some well known experts all over the world     **Public Health and Agricultural Biotechnology** Mitchell Berger,2000-09 Genetically modified foods present numerous ethical environmental health and legal challenges This report synthesizes information from many websites scientific journals newspapers and books that discuss the controversy surrounding genetically modified foods The author has attempted to show that although the future applications of agrobiotechnology appear promising the ways in which it is currently being used and regulated should be evaluated with a healthy degree of skepticism     Agricultural Biotechnology Arie Altman,1997-11-06 This work integrates basic biotechnological methodologies with up to date agricultural practices offering solutions to specific agricultural needs and problems from plant and crop yield to animal husbandry It presents and evaluates the limitations of classical methodologies and the potential of novel and emergent agriculturally related biotechnologies     Genetically Modified Athletes Andy Miah,2004-08-02 This is the first book to examine the profound ethical issues raised by the use of genetic technologies in sports asking whether sporting authorities can or even should protect sport from genetic modification     *National Library of Medicine Current Catalog* National Library of Medicine (U.S.),1993     Biotechnology: Legal, economic and ethical dimensions Hans-Jürgen Rehm,Gerald Reed,1995     **Human Genome News** ,1989     **Proceedings** Unesco.
