Shaping The City:

Shaping the City Rodolphe El-Khoury, Edwards Robbins, 2015-06-23 Taking on the key issues in urban design *Shaping the City* examines the critical ideas that have driven these themes and debates through a study of particular cities at important periods in their development As well as retaining crucial discussions about cities such as Los Angeles Atlanta Chicago Detroit Philadelphia and Brasilia at particular moments in their history that exemplified the problems and themes at hand like the mega city the post colonial city and New Urbanism in this new edition the editors have introduced new case studies critical to any study of contemporary urbanism China Dubai Tijuana and the wider issues of informal cities in the Global South The book serves as both a textbook for classes in urban design planning and theory and is also attractive to the increasing interest in urbanism by scholars in other fields *Shaping the City* provides an essential overview of the range and variety of urbanisms and urban issues that are critical to an understanding of contemporary urbanism

Re-shaping Cities Michael Guggenheim, Ola Söderström, 2009-12-04 How are building types such as skyscrapers mosques or living history museums imported adapted and contested in different societies Our urban landscapes are reshaped by the global circulation of models drawn from elsewhere This original collection examines how architectural ideas social models and building forms circulate round the world and become adapted to local conditions

Cities and Natural Process Michael Hough, 2004 An updated and revised discussion of the fundamental conflict in the perception of nature and an expression of the essential need for an environmental view when approaching urban design

Cities and Development Sean Fox, Tom Goodfellow, 2016-02-11 For the first time in human history more people now live in towns and cities than in rural areas In the wealthier countries of the world the transition from predominantly rural to urban habitation is more or less complete But in many parts of Africa Asia and Latin America urban populations are expanding rapidly Current UN projections indicate that virtually all population growth in the world over the next 30 years will be absorbed by towns and cities in developing countries These simple demographic facts have profound implications for those concerned with understanding and addressing the pressing global development challenges of reducing poverty promoting economic growth improving human security and confronting environmental change This revised and expanded second edition of *Cities and Development* explores the dynamic relationship between urbanism and development from a global perspective The book surveys a wide range of topics including the historical origins of world urbanization the role cities play in the process of economic development the nature of urban poverty and the challenge of promoting sustainable livelihoods the complexities of managing urban land housing infrastructure and urban services and the spectres of endemic crime conflict and violence in urban areas This updated volume also contains two entirely new chapters one that examines the links between urbanisation and environmental change and a second that focuses on urban governance and politics Adopting a multidisciplinary perspective the book critically engages with debates in urban studies geography and international development studies Each chapter includes supplements

in the form of case studies chapter summaries questions for discussion and suggested further readings The book is targeted at upper level undergraduate and graduate students interested in geography urban studies and international development studies as well as policy makers urban planners and development practitioners

Nation's Cities National League of Cities, 1968

The Shape of the City John Sewell, 1993 Sewell explains how Toronto was subjected to the same fraudulent urban development theories and practices as other North American cities and how it has survived them to become a model for sane growth He traces the ideals to their origin in the 19th century the epidemic of modern planning after World War II its rejection the creation of alternatives and the lingering problem of the suburbs Paper edition unseen 18 95 Annotation copyright by Book News Inc Portland OR
