Sharing The World Sustainable Living And Global Equity In The 21st Century:

Sharing the World Michael Carley, Phillipe Spapens, 2017-09-25 This work proposes a framework based on the concept of a fair distribution of environmental space to include the diverse needs of North and South Drawing on research in 38 countries it aims to give an equitable basis for global development in order to achieve sustainable consumption by the year 2050 The environmental space approach seeks to explain the limitations of the global market economy as a tool of development and to give us the means to alter it in order to achieve a genuine quality of life rather than simple economic growth In addition this book seeks to urge all countries and peoples to consider and evaluate the environmental space approach and to join in a movement towards sustainable production and consumption for the 21st century

Environmentalism David Pepper, Frank Webster, George Revill, 2003 Managing Sustainable Development Michael Carley, Ian Christie, 2017-09-25 In a world where environmental problems spill across political administrative and disciplinary boundaries there is a pressing need for a clear understanding of the kinds of organizations management structures and policy making approaches required to bring about socially equitable and ecologically sustainable development In this second edition the authors incorporate lessons from a decade of work on the conditions of sustainability in both developed and developing countries They prescribe action networks partnerships of flexible achievement oriented actors and present new case studies demonstrating the success of organizations that have applied this approach They also introduce case studies on action networks that work simultaneously on international national and local levels **Environment and the City** Joe Ravetz, Clive George, Joe Howe, 2004-07-15 For the first time at the beginning of the twenty first century urban dwellers outnumber rural residents and this trend is set to continue Consequently one of the most pressing issues of our time is how to square the social and economic development of cities with their environmental limits and those of the wider environment The theme of the environment and city is topical at every level from the politics of global trade to local community networks Environment and the City looks at the evolution of cities in the developed and the developing world and the implications for resource consumption and environmental impacts It takes a cross cutting approach with new thinking on multiple geographies the configuration of networks exclusion consumption risk and ecological footprint Urban environmental themes and their related social economic and political agendas are outlined In turn the environmental impacts and environmental agendas relating to key sectors of the urban economy are discussed The global context to such issues is then explored before the practical tools and methods of urban environmental management are investigated The theme of the sustainable city emerges from this not so much as a standard menu but as a learning process between all sections of society This book a valuable resource provides a concise accessible route map for all students interested in the environmental issues emanating from our urban society Written to aid student understanding the easily navigable text features boxed practical examples discussion points signposts to reading and websites and a glossary *Area Studies (Regional Sustainable Development*

Spiritual Values for Earth Community David G. Hallman,2000 Contemporary threats to the earth and to human life suggest that for many people today the predominant values are consumerism economic globalisation and violence In the face of the potent destructive forces unleashed by such lifestyles this book argues that respecting the earth and building sustainable community call us to live out such spiritual values as gratitude humility sufficiency justice peace love faith and hope After an exposition of how each of these values motivates active engagement for earth community in Christian and other faith traditions the author presents a case study of how individuals and groups are seeking to put that value into practice Suggestions from group study and a bibliography enhance the value of this book for local study groups Habitat Debate ,1998

Governance, Development and Globalization Julio Faúndez,Mary Footer,Joseph Jude Norton,2000 Governance and law are today firmly on the agenda of the World Bank and other international financial institutions As the scope of the governance agenda expands so does the need to discuss and analyse the variety of factors that should be taken into account to ensure success in the implementation of governance related projects This book written by a distinguished group of lawyers and practitioners from developed and developing countries addresses a wide range of issues related to governance both at the local and international levels It covers topics that have long been on the governance agenda such as judicial training privatisation financial sector reform and various aspects of capacity building It also covers many issues that have only recently become part of the development agenda such as legal education the politics of institution building in rural and urban communities and the role of political parties in the establishment of democracy It includes studies that explore the often neglected links between the structures of domestic governance and the growing number of international economic law rules in the areas of trade investment technology transfer and the environment Bending the Curve Paul Raskin,1998
