Shark Attack Against Man Henry David Baldrige,1973 Data from 1165 case histories of shark attack against man were reduced to a form handleable by automatic data retrieval systems Numerous probes by computer were made to provide statistical significance to the existence or absence of common factors associated with known instances of predaceous shark behavior and evaluate the present approach of gathering meaningful data on shark attack and thereby determine requirements for maintaining such an effort in the future Although information was carefully screened for correlations between occurrence of shark attack and a number of environmental and behavioral parameters it was considered of greater importance that patterns or relationships be identified that distinguished victims from non victims among exposed populations Points of interest were examined in the light of previously accepted correlations and popular beliefs Modified author abstract

The Real Jaws Rachel Lee Perez,2025-08-30 Explores the 1916 New Jersey shark attacks their impact on shark fear and how media shaped harmful misconceptions In the Summer of 1916 a series of shark attacks along the New Jersey shore would send shockwaves across its otherwise peaceful beach towns Spanning a terrifying two weeks including the deaths of nearly five people these attacks would officially cement an innate fear of sharks that humans have felt since the beginning of time Although initially kept under wraps by the tourism industry these attacks would ultimately plaster the front pages of newspapers across the United States and even overseas As the news spread the line between fact and fiction blurred reshaping our cultural and scientific understanding of the beasts of the ocean It was the 1916 shark attacks that would establish our modern day misconstrued perception of sharks as evil man eating monsters and would later inspire the film Jaws which would perpetuate the same harmful narrative The Real Jaws takes an in depth look at each one of the attacks and how they instilled a centuries long fear of the ocean s apex predator It explores the various theories explaining why these attacks may have occurred and the probability of something like this happening again And finally it analyses the way the harmful misconceptions derived from films like Jaws have redefined humanity s relationship
