The Communicator's Guide to Media Law and Ethics Mark Pearson, 2023-11-23. This book offers an introduction to the key legal and ethical topics confronting Australian journalists and strategic communicators both at home and internationally, and offers a suite of reflective techniques for navigating them. It starts by positioning morals, ethics, and the law in their historical and philosophical frameworks by tracing the evolution of free expression and professional media ethics. Media law and ethics are then contextualized in their modern international human rights framework. Readers are equipped with a skill set for reflecting on the law and ethics of professional media dilemmas, including mindful reflection, the Potter Box journaling concept, mapping, and discussion. Such approaches are then applied to key topic areas, including free expression, reputation, confidentiality, privacy, justice, intellectual property, national security, discrimination, and harassment, and conflicted interests. Each is examined in terms of its philosophical underpinnings, relationship to human rights, professional ethical context, international examples, legal principles, key Australian laws, legal cases, and strategies for applying reflective practice techniques. It concludes on a confident note, imploring communicators to engage in constructive and mindful strategic communication with the authority and confidence that results from a working knowledge of media law and ethics. This handbook is for professional communicators and students in all fields, but particularly in journalism, public relations, corporate communication, media relations, and marketing.

Qualitative Research Methods for Media Studies Bonnie S. Brennen, 2025-01-20. This fully updated fourth edition provides students and researchers with the tools they need to perform critically engaged, theoretically informed research using methods that include interviewing, focus groups, historical research, oral histories, textual analysis, ethnography, and participant observation, and digital ethnography and netnography. Each chapter features step-by-step instructions that integrate theory with practice, as well as a case study drawn from published research demonstrating best practices for media scholars. Readers will also find in-depth discussions of the challenges and ethical issues that may confront researchers using a qualitative approach. With new case studies and examples throughout, this fourth edition also includes updated and expanded material on performing data analysis, how to analyze and understand research findings, performing social media research, and the use of big data and Artificial Intelligence (AI). This includes a brand new chapter on generative AI, which examines recent advancements and technological developments and considers ways qualitative researchers can use it for their research. A comprehensive and

accessible guide for those hoping to explore this rich vein of research methodology this book provides students and scholars with all the tools they need to be able to work with in today's convergent media environment
