McLeod, Verna M. Adams, 2012-12-06 Research on cognitive aspects of mathematical problem solving has made great progress in recent years but the relationship of affective factors to problem solving performance has been a neglected research area The purpose of *Affect and Mathematical Problem Solving A New Perspective* is to show how the theories and methods of cognitive science can be extended to include the role of affect in mathematical problem solving The book presents Mandler s theory of emotion and explores its implications for the learning and teaching of mathematical problem solving Also leading researchers from mathematics education and psychology report how they have integrated affect into their own cognitive research The studies focus on metacognitive processes aesthetic influences on expert problem solvers teacher

decision making technology and teaching problem solving and beliefs about mathematics The results suggest how emotional factors like anxiety frustration joy and satisfaction can help or hinder performance in problem solving Teaching Secondary Mathematics Douglas K. Brumbaugh, David Rock, 2006 Grounded in research and theory this text for secondary mathematics methods courses provides useful models of how concepts typically found in a secondary mathematics curriculum can be delivered so that students develop a positive attitude about learning and using mathematics in their daily lives *Reconstructing School Mathematics* Stephen I. Brown, 2001 This book offers a critique of two major themes of the modern reform movement in mathematics education problem solving and the applications of mathematics to the real world In examining the educational fallacy inherent in the impulse to move unflinchingly from problem to problem solving Stephen I Brown demonstrates the potential of mathematical reflection to reveal aspects of self and society that have been suppressed in curriculum He then argues that in seeking connections between mathematics and the real world we have tended to reduce their relationship to one of modeling Furthermore in constructing what is real in an overly concrete way we have lost sight of the wonder of what is real in both mathematics and the world Brown explores alternative text formats including that of the novel and the Talmud as vehicles to rejuvenate the educational potential of problems and of real world connections
