CPS for Kids Bob Eberle, Bob Stanish, 1996 This book will teach your students an exciting and powerful problem solving method from start to finish includes 30 reproducible classroom activities Students will learn to work together and individually to find appropriate and unique solutions to real world problems by using this tested method Grades 2-8 The Teaching and Assessing of Mathematical Problem Solving National Council of Teachers of Mathematics, 1988 Problem Solving in School Science, 1984 **How to Solve Typical School Problems** Nancy Ohle, Cindy Lakin Morley, 1994 Explore a three phase approach for solving any typical school problem **Complex Problem Solving Beyond the Psychometric Approach** Wolfgang Schoppek, Joachim Funke, Magda Osman, Annette Kluge, 2018-09-28 Complex problem solving CPS and related topics such as dynamic decision making DDM and complex dynamic control CDC represent multifaceted psychological phenomena In a broad sense CPS encompasses learning decision making and acting in complex and dynamic situations Moreover solutions to problems that people face in such situations are often generated in teams or groups This adds another layer of complexity to the situation itself because of the emerging issues that arise from the social dynamics of group interactions This framing of CPS means that it is not a single construct that can be measured by using a particular type of CPS task e.g. minimal complex system tests which is a view taken by the psychometric community The proposed approach taken here is that because CPS is multifaceted multiple approaches need to be taken to fully capture and understand what it is and how the different cognitive processes associated with it complement each other Thus this Research Topic is aimed at showcasing the latest work in the fields of CPS as well as DDM and CDC that takes a holistic approach to investigating and theorizing about these abilities The collection of articles encompasses conceptual approaches as well as experimental and correlational studies involving established or new tools to examine CPS DDM and CDC This work contributes to answering questions about what strategies and what general knowledge can be transferred from one type of complex and dynamic situation to another what learning conditions result in transferable knowledge and skills and how these features can be trained
