PV Charging and Storage for Electric Vehicles Pavol Bauer, Gautham Ram Chandra Mouli, 2021-09-02 Electric vehicles are only green as long as the source of electricity is green as well. At the same time, renewable power production suffers from diurnal and seasonal variations, creating the need for energy storage technology. Moreover, overloading and voltage problems are expected in the distributed network due to the high penetration of distributed generation and increased power demand from the charging of electric vehicles. The energy and mobility transition hence calls for novel technological innovations in the field of sustainable electric mobility powered from renewable energy. This Special Issue focuses on recent advances in technology for PV charging and storage for electric vehicles. **Grid-to-Vehicle (G2V) and Vehicle-to-Grid (V2G)**

Technologies Sekyung Han, Moses Amoasi Acquah, 2021-03-16 This Special Issue Grid to Vehicle G2V and Vehicle to Grid V2G Technologies was in session from 1 May 2019 to 31 May 2020. For this Special issue, we invited articles on current state of the art technologies and solutions in G2V and V2G, including but not limited to the operation and control of gridable vehicles, energy storage and management systems, charging infrastructure and chargers, EV demand and load forecasting, V2G interfaces and applications, V2G and energy reliability and security, environmental impacts and economic benefits, as well as demonstration projects and case studies in the aforementioned areas. Articles that deal with the latest hot topics in V2G are of particular interest, such as V2G and demand side response, control technique, smart charging infrastructure and grid planning, advanced power electronics for V2G systems, adaptation of V2G systems in the smart grid, adaptation of smart cities for a large number of EVs, integration and the optimization of V2G systems, utilities and transportation assets for advanced V2G systems, wireless power transfer systems for advanced V2G systems, fault detection, maintenance and diagnostics in V2G processes, communications protocols for V2G systems, energy management system EMS in V2G systems, IoT for V2G systems, distributed energy and storage systems for V2G transportation networks and V2G energy management for V2G smart charging/discharging stations for efficient V2G, environmental and socio-economic benefits and challenges of V2G systems, and building integrated V2G systems. BIV2G. Five manuscripts are published in this Special Issue, including: An Ensemble Stochastic Forecasting Framework for Variable Distributed Demand Loads by Agyeman et al; Where Will You Park? Predicting Vehicle Locations for Vehicle to Grid; An MPC Scheme with Enhanced Active Voltage Vector Region for V2G Inverter by Shipman et al; Electric Vehicles Energy Management with V2G G2V Multifactor Optimization of Smart Grids by Xia et al; and A Review on Communication Standards and Charging Topologies of V2G and V2H Operation Strategies by Savitti et al.

Advances in Electrical and Computer Technologies Thangaprakash Sengodan, M. Murugappan, Sanjay Misra, 2020-09-07 The book comprises select proceedings of the first International Conference on Advances in Electrical and Computer Technologies 2019 (ICAECT 2019). The papers presented in this book are peer reviewed and cover a wide range of topics in Electrical and Computer Engineering fields. This book contains the papers presenting the latest developments in the

areas of Electrical Electronics Communication systems and Computer Science such as smart grids soft computing techniques in power systems smart energy management systems power electronics feedback control systems biomedical engineering geo informative systems grid computing data mining image and signal processing video processing computer vision pattern recognition cloud computing pervasive computing intelligent systems artificial intelligence neural network and fuzzy logic broad band communication mobile and optical communication network security VLSI embedded systems optical networks and wireless communication This book will be of great use to the researchers and students in the areas of Electrical and Electronics Engineering Communication systems and Computer Science

Intelligent and Sustainable Power and Energy Systems M. Premkumar,Pasumarthi Usha,Sujit Kumar,Manikanta Gopiseti,2025-07-23 Intelligent and Sustainable Power and Energy Systems delves into the critical advancements shaping the future of global energy This compilation presents cutting edge research and innovative solutions addressing the urgent need to transition towards environmentally responsible and technologically sophisticated energy infrastructures Explore the integration of artificial intelligence machine learning and advanced control systems in optimising energy generation distribution and consumption Discover novel approaches to renewable energy integration smart grid technologies and energy storage solutions all geared towards enhancing efficiency and minimising environmental impact From theoretical frameworks to practical implementations this work offers a comprehensive overview of the latest developments providing essential insights for researchers engineers and policymakers striving to build a resilient and sustainable energy future This book is a vital resource for navigating the complex challenges and opportunities in the evolving landscape of power and energy systems

Innovative Computing and Communications Aboul Ella Hassanien,Sameer Anand,Ajay Jaiswal,Prabhat Kumar,2025-09-30 This book includes high quality research papers presented at the Eighth International Conference on Innovative Computing and Communication ICICC 2025 which is held at the Shaheed Sukhdev College of Business Studies University of Delhi Delhi India on 14 15 February 2025 Introducing the innovative works of scientists professors research scholars students and industrial experts in the field of computing and communication the book promotes the transformation of fundamental research into institutional and industrialized research and the conversion of applied exploration into real time applications

Smart Grid Security and Protection Altaf Q. H. Badar,M. Nabab Alam,Asmae Berrada,2025-05-02 This book features papers from the International Conference on Sustainable Power and Energy Research ICSPER 2024 Covering the spectrum of power and energy it focuses on various aspects of emerging technologies research ideas real time experiences and understanding of technology utilization in electrical power and energy systems The book introduces new ideas in power system stability operation and control renewable energy resources and energy storage power electronics drives and electric vehicles smart grid and wide area monitoring data science applications and cyber security in power systems energy market and deregulation power system protection condition monitoring and HV engineering soft computing techniques in electrical engineering power

applications economic environmental and social impact and integration with renewable energy This book captures the state of the art in electric vehicle charging infrastructure deployment their applications architectures and relevant technologies In addition this book identifies potential research directions and technologies that facilitate insights on EV charging in various charging places such as smart home charging parking EV charging and charging stations This book will be essential for power system architects mechanics electrical engineers practitioners developers practitioners researchers academicians and students interested in the problems and solutions to the state of the art status of electric vehicles

Electric Vehicle Integration via Smart Charging Vahid Vahidinasab, Behnam Mohammadi-Ivatloo, 2022-09-09 This book brings together important new contributions covering electric vehicle smart charging EVSC from a multidisciplinary group of global experts providing a comprehensive look at EVSC and its role in meeting long term goals for decarbonization of electricity generation and transportation This multidisciplinary reference presents practical aspects and approaches to the technology along with evidence from its applications to real world energy systems Electric Vehicle Integration via Smart Charging is suitable for practitioners and industry stakeholders working on EVSC as well as researchers and developers from different branches of engineering energy transportation economic and operation research fields

Technologies and Applications for Smart Charging of Electric and Plug-in Hybrid Vehicles Ottorino Veneri, 2016-12-30 This book outlines issues related to massive integration of electric and plug in hybrid electric vehicles into power grids Electricity is becoming the preferred energy vector for the next new generation of road vehicles It is widely acknowledged that road vehicles based on full electric or hybrid drives can mitigate problems related to fossil fuel dependence This book explains the emerging and understanding of storage systems for electric and plug in hybrid vehicles The recharging stations for these types of vehicles might represent a great advantage for the electric grid by facilitating integration of renewable and distributed energy production This book presents a broad review from analyzing current literature to on going research projects about the new power technologies related to the various charging architectures for electric and plug in hybrid vehicles Specifically focusing on DC fast charging operations as well as grid connected power converters and the full range of energy storage systems These key components are analyzed for distributed generation and charging system integration into micro grids The authors demonstrate that these storage systems represent effective interfaces for the control and management of renewable and sustainable distributed energy resources New standards and applications are emerging from micro grid pilot projects around the world and case studies demonstrate the convenience and feasibility of distributed energy management The material in this unique volume discusses potential avenues for further research toward achieving more reliable more secure and cleaner energy

Handbook on New Paradigms in Smart Charging for E-Mobility Abhishek Kumar, Ramesh C. Bansal, Praveen Kumar, Xiangning He, 2025-03-21 Handbook on New Paradigms in Smart Charging for E Mobility Global Trends Policies and Practices provides a complete package for understanding and developing smart chargers for e mobility applications It

discusses various concepts required for developing charging infrastructure and usage of different kinds of storage technologies power electronics converters controllers communication requirements grid infrastructure sustainable technologies policy frameworks and all other related crucial aspects of E mobility Each part of the book covers a subdomain of e mobility beginning with an introductory chapter reviewing existing literature the subsequent chapters are arranged to each follow the previous one Other available books focus on specific technical subdomains of e mobility but none provides the wider outlook to meet the requirements of all audiences This book uniquely brings together topics that are not otherwise easily accessible or available to these audiences This book will be beneficial for engineers scientists and researchers providing them with a comprehensive standard benchmark work to explore the evolving aspects of charging infrastructure for e mobility Further it will also help policymakers practitioners and government entities formulate policies for successful implementations of e motility for their masses The techno socio economic focus will serve as standard literature for all Takes a modular approach with each module catering to a different sub domain of e mobility Includes standalone chapters that cover out of the box work related to e mobility Presents the latest advances and detailed technical descriptions of smart charging infrastructures
