## **Privatization Current Issues:**

**The Environmental Implications of Privatization** Magda Lovei, Bradford S. Gentry, 2002 Governments have increasingly come to recognize the economic potential and fiscal advantages of privatization Privatization under the right conditions can also yield environmental benefits and contribute to sustainable development This report contains a number of case studies which highlight the lessons learned about the environmental implications of privatization It stresses that privatization offers an opportunity for making strategic decisions with longer term impacts This report also emphasizes that integrating environmental and social considerations into the privatization process leads to more sustainable outcomes It also recommends strategies toward building on the positive linkages between privatization and environmental protection

Brown, Giles Ridley, 1994 Reviewing both the business organization and capital raising aspects of the process this book sets out to demystify the privatization process which is transforming the economics of the world The focus is primarily on France Italy UK Canada Venezuela Argentina Brazil and Mexico *Environmental Performance Reviews* United Nations. **The Challenges of Privatization** Bernardo Bortolotti, Domenico Siniscalco, 2004-03-11 From 1997 to 2001 more than 4 000 privatization operations have been carried out in more than 100 countries bringing in government revenues of over 1 362 billion dollars The phenomenon which grew exponentially at the end of the 1990s and then abruptly slowed down had dramatic consequences on the performance of state owned enterprises and a significant impact on industrialized countries as well as emerging and less developed economies Yet there have been surprisingly few attempts to provide a systematic empirical account of the privatization process at the worldwide level Why do governments privatize Why do some countries accomplish large scale privatization programmes and

others never privatize at all Is privatization a trend or a cycle Furthermore how do governments privatize Do governments really transfer ownership and control of state owned enterprises or does private ownership tend to coexist with public control This book provides some answers to these important questions trying to test research hypotheses set forth by the recent economic theory of privatization Comprehensive cross country empirical analyses carried out over a period of more than twenty years are used in the book to show that privatization has taken place all over the world sometimes spontaneously more often under the pressure of economic and budgetary constraints Several of the goals of the privatization have been met but despite proclamations and programmes only a small minority of countries has carried out a genuine privatization process completely transferring ownership of state owned enterprises to the private sector A lack of political will is to some extent at the root of this reluctance However this reluctance can be traced back partly to structural factors that would make an orderly privatization difficult such as the absence of developed capital markets appropriate regulation and suitable institutions

**Recent FDI Trends, Policies and Challenges in South-East European Countries** Gábor Hunya,2000

*Analysis of Current Events* ,2000 *Privatization in East Germany* Mr.Dieter Bös,1992 This paper deals with the privatization restructuring and liquidation of East German industrial firms A partnership model is suggested for privatization where the Government s property trust Treuhandanstalt THA is made a silent partner of the private investors The application of a general scheme of wage subsidies is rejected in the paper Furthermore the paper argues against restructuring policies of the Government s property trust and proposes to set decreasing limits on the trust s finances for the years following 1993 The decreasing financial inflow will force the Government s trust to close firms and will also signal the commitment of the Government to liquidate the trust itself by say the year 2000 *Transnational Business Problems* Detlev F.
