PRIVATIZING JUSTICE

ARBITRATION AND THE DECLINE OF
PUBLIC GOVERNANCE IN THE U.S.

Privatizing Criminal Justice

Christopher Hamerton, Sue Hobbs

Privatizing Criminal Justice:

Privatizing Criminal Justice Roger Matthews, 1989 Assesses the state of the debate on the privatization of justice Key aspects of the arguments are examined and compared as the authors clarify both the theoretical issues and the practical problems involved in the privatization of justice Privatising Criminal Justice Christopher Hamerton, Sue Hobbs, 2022-09-30 Privatising Criminal Justice explores the social cultural and political context of privatisation in the criminal justice sector In recent years the criminal justice sector has made various strategic partnerships with the private sector exemplified by initiatives within the police the prison system and offender services This has seen unprecedented growth in the past 30 years and a veritable explosion under the tenure of the coalition government in the UK This book highlights key areas of domestic and global concern and illustrates with detailed case studies of important developments It connects the study of criminology and criminal justice to the wider study of public policy government institutions and political decision making In doing so Privatising Criminal Justice provides a theoretical and practical framework for evaluating collaborative public and private sector response to social problems at the beginning of the twenty first century An accessible and compelling read this book will appeal to students and scholars of criminology criminal justice sociology and politics and all those interested in how privatisation has shaped the contemporary criminal justice system **Privatizing Correctional Institutions** Gary W. Bowman, 2023-04-14 With more than one million people behind bars the United States imprisons a larger share of its population than any other industrialized nation This has precipitated a serious overcrowding problem with federal and state prisons currently operating well beyond capacity Conventional efforts appear unable to cope with the increasing shortage of beds or with inadequate rehabilitation services A bold solution is required increasingly it is being seen to reside in the private sector This timely volume explores the issues of private versus public financing construction and management of medium and high security prisons Private prisons are not a new concept in the United States They have existed in several forms since the eighteenth century The opening chapters evaluate historical cases of prisons for profit examining the concerns of labor abuses of inmates and the source and resolution of disputes between private and public sectors These chapters argue that the experience gained through privatization does not justify current opposition from civil libertarians or labor unions Chapters dealing with the modern contracting out of complete management and limited services document the growing trend toward privatization and instances of public private partnership in prison industries The assembled evidence indicates clearly that privately run prisons have shown significant cost savings and good quality of provision for prisoners while still being profitable However the authors caution that these promising results must be reinforced by public safeguards in the contracting stage and monitoring to assure good service and security With the American prison system in disarray the public interest demands that government look beyond the public or private identity of those who wish to provide correctional services and focus instead on who can provide the best services at a given cost It is

essential to state that correctional services should attain several objectives and not merely cost minimization. The analysis and recommendations presented here will aid in the task. Privatizing Correctional Institutions will be of interest to law enforcement officials, public policy analysts, penologists, and criminologists.

The Privatization of Policing Brian Forst, Peter K. Manning, 1999-06-10. The increasing reliance on private security services raises questions about the effects of privatization on the quality of public police forces, particularly in high crime, low income areas. In an effective pro and con format, two experts on policing offer two strikingly different perspectives on this trend towards privatization. In the process, they provide an unusually thoughtful discussion of the origins of both the public police and the private security sectors, the forces behind the recent growth of private security operations, and the risks to public safety posed by privatization. In his critique of privatization, Peter K. Manning focuses on issues of free market theory and management practices such as Total Quality Management that he believes are harmful to the traditional police mandate to control crime. He questions the appropriateness of strategies that emphasize service to consumers. For Brian Forst, the free market paradigm and economic incentives do not carry the same stigma. He argues that neither public nor private policing should have a monopoly on law enforcement activities, and he predicts an even more varied mix of public and private police activities than are currently available. Following the two main sections of the book, each author assesses the other's contribution, reflecting on not just their points of departure but also on the areas in which they agree. The breadth and depth of the discussion makes this book essential for both scholars and practitioners interested in policing generally and privatization in particular.

Privatization in Criminal Justice Bruce L. Benson, 1996. *Privatizing the United States Justice System* Gary W. Bowman, Simon Hakim, Paul Seidenstat, 1992. As more areas of government experience budget problems, the search for efficient and cost effective services has intensified. Private sector involvement is under heavy consideration. Twenty-eight original essays reflect expert opinions in three areas: police, adjudication, and corrections. Included are two reprinted articles by Warren Burger, former Chief Justice of the United States, and Richard Neely, Chief Justice of the West Virginia Supreme Court. Perspectives range from desirability to implementation. Part one analyzes public and private provision of the various police functions, with an evaluation of private police services. Part two focuses on the supply of private judiciary services in civil cases. Part three looks at privatizing correctional services, from supplies to complete private management.

Criminal Justice and Privatisation Philip Bean, 2020-06-07. Over the past few years, opposition to the privatisation of public services in the United Kingdom and elsewhere has grown, especially in areas related to criminal justice. Privatisation has existed within the British criminal justice system at least since the early 1990s, but the privatisation of the Probation Service in 2014 was a significant landmark in this process and signalled a larger programme of privatisation to come. *Criminal Justice and Privatisation* works to examine the impact of privatisation on the criminal justice system and to explore the potential effects of privatising other areas, including the police and the security industry. By including chapters from practitioners and academics alike, the book

offers an expansive overview of the criminal justice system as well as observations of the effect of privatisation at ground level By also exploring the way the private companies are paid how they operate and what private companies do this book offers an insight into and the future of privatisation within the public sector Written in a clear and direct style this book will appeal to students and scholars in criminology sociology cultural studies social theory and those interested in learning about the effects of privatisation
