Apes and Human Evolution Russell H. Tuttle, 2014-02-17 Russell Tuttle synthesizes a vast literature in primate evolution and behavior to explain how apes and humans evolved in relation to one another and why humans became a bipedal tool making culture inventing species distinct from other hominoids He refutes the theory that we are sophisticated instinctively aggressive and destructive killer apes Hominin Environments in the East African Pliocene René Bobe, Zeresenay Alemseged, Anna K. Behrensmeyer, 2007-09-08 This volume presents the work of researchers at many sites spanning the East African Pliocene The authors take a broad approach that seeks to compare paleoenvironmental and paleoecological patterns across localities and among various taxonomic groups This volume aims to synthesize large amounts of faunal data and to present the evolution of East African vertebrates in the context of environmental and climatic changes during the Pliocene

Memetics Tim Tyler, 2011-08-19 Memetics is the name commonly given to the study of memes a term originally coined by Richard Dawkins to describe small inherited elements of human culture Memes are the cultural equivalent of DNA genes and memetics is the cultural equivalent of genetics Memes have become ubiquitous in the modern world but there has been relatively little proper scientific study of how they arise spread and change apparently due to turf wars within the social sciences and misguided resistance to Darwinian explanations being applied to human behaviour However with the modern explosion of internet memes I think this is bound to change With memes penetrating into every mass media channel and with major companies riding on their coat tails for marketing purposes social scientists will surely not be able to keep the subject at arm's length for much longer This will be good because an understanding of memes is important Memes are important for marketing and advertising They are important for defending against marketing and advertising They are important for understanding and managing your own mind They are important for understanding science politics religion causes propaganda and popular culture Memetics is important for understanding the origin and evolution of modern humans It provides insight into the rise of farming science industry technology and machines It is important for understanding the future of technological change and human evolution This book covers the basic concepts of memetics giving an overview of its history development applications and the controversy that has been associated with it **Asian Paleoanthropology** Christopher J. Norton, David R. paleoenvironmental records Papers include detailed studies of the theoretical constructs underlying the move out of Africa including detailed reconstructions of the paleoenvironment and possible migration routes Other papers detail the Plio Pleistocene archaeological and hominin fossil records of particular regions *Human Origins* Samuel Laing, 1894 **The Evolution of Human Life History** Kristen Hawkes, Richard R. Paine, 2006 Human beings may share 98 percent of their genetic makeup with their nonhuman primate cousins but they have distinctive life histories When and why did these uniquely human patterns evolve To answer that question this volume brings together specialists in hunter gatherer behavioral ecology and demography human growth development and nutrition paleodemography human paleontology primatology and the genomics of aging The contributors identify and explain the peculiar features of human life histories such as the rate and timing of processes that directly influence survival and reproduction Drawing on new evidence from paleoanthropology they question existing arguments that link human s extended childhood dependency and long post reproductive lives to brain development learning and distinctively human social structures The volume reviews alternative explanations for the distinctiveness of human life history and incorporates multiple lines of evidence in order to test them

Nature Encyclopedia of the Human Genome: Genome databases - Mitochondrial genome: Evolution David Neil Cooper, 2003 *The Balance of Human Kindness and Cruelty* Robert B. Edgerton, 2005 This book reviews the many conflicting theories about human nature those that stress our dark side and those that emphasize our goodness It then explores actual human behavior in societies around the world beginning with earliest and smallest known societies foraging people such as the Kung San Pygmies then various kinds of farming people and finally city dwellers It also focuses on human behavior during the 20th Century providing detailed examples of human kindness and inhumanity It also examines human behavior under the most terrible kind of stress imaginable deadly prolonged famine How people respond to famine around the world is described with an emphasis on the killer famine that starved much of Ireland from 1845 to 1850 Many Irish people died of starvation but unlike other parts of the world where starvation led the strong to kill and eat the weak Irish culture forbade such killing and in reality it did not take place Finally the book summarizes the evidence then concludes that even though people have biological urges that lead toward anti social behavior human rule systems can control most of these anti social predispositions **Out of Africa I** John G. Fleagle, John J. Shea, Frederick E. Grine, Andrea L. Baden, Richard E. Leakey, 2010-08-20 For the first two thirds of our evolutionary history we hominins were restricted to Africa Dating from about two million years ago hominin fossils first appear in Eurasia This volume addresses many of the issues surrounding this initial hominin intercontinental dispersal Why did hominins first leave Africa in the early Pleistocene and not earlier What do we know about the adaptations of the hominins that dispersed their diet locomotor abilities cultural abilities Was there a single dispersal event or several Was the hominin dispersal part of a broader faunal expansion of African mammals northward What route or routes did dispersing populations take **Records of the Academy** American Academy of Arts

and Sciences,2002 Human Evolution ,1992 **The Fate of Plasmid DNA Following Microinjection Into Fertilized Eggs of the Frog *Xenopus Laevis*** Debra Jane Endean,1986 Topley & Wilson's Principles of Bacteriology, Virology, and Immunity: Bacterial diseases William Whiteman Carlton Topley,Sir Graham Selby Wilson,1990 Developments in Biological Standardization ,1974 Consists of proceedings of symposia organized by the International Association of Biological Standardization *Cambridge Scientific Biochemistry Abstracts* ,1992 Journal of Clinical Microbiology ,2004
