Integrative Problem-Solving in a Time of Decadence George Christakos, 2010-12-10 Presents a unique study of Integrative Problem Solving IPS The consideration of Decadence is essential in the scientific study of environmental and other problems and their rigorous solution because the broad context within which the problems emerge can affect their solution Stochastic reasoning underlines the conceptual and methodological framework of IPS and its formulation has a mathematical life of its own that accounts for the multidisciplinary of real world problems the multisourced uncertainties characterizing their solution and the different thinking modes of the people involved Only by interpolating between the full range of disciplines including stochastic mathematics physical science neuropsychology philosophy and sociology and the associated thinking modes can scientists arrive at a satisfactory account of problem solving and be able to distinguish between a technically complete problem solution and a solution that has social impact Multiple Criteria Problem Solving S. Zionts, 2012-12-06 The objective of this conference was to foster a healthy exchange of ideas and experience in the domain of multiple criteria problem solving This conference was an outgrowth of an earlier conference I organized with Herve Thiriez at CESA Jouy en Josas France in 1975 during my stay at the European Institute in Brussels When I re joined the State University of New York at Buffalo that year I began to search for potential sponsors for this conference Approximately one year later when the prospects began to look promising I contacted several individuals to act as an informal coordinating committee for the conference I wanted to avoid biasing the conference completely to my way of thinking The members of this committee were Jim Dyer Peter Fishburn Ralph Keeney Bernard Roy Universite de Paris IX Dauphine who was unable to participate in the conference and Milan Zeleny Though the committee did not meet per se their inputs regarding format possible participants number of participants length of the conference and so on were of great value to me in planning and organizing the conference I wish to acknowledge the contributions of this group We were most fortunate in obtaining the financial support of the European Institute for Advanced Studies in Management Brussels one of the sponsors of the Jouy en Josas conference the Office of Naval Research and the State University of New York at Buffalo
