This supplement to the NANDA International Nursing Diagnoses Definitions and Classification 2021-2023 12th Edition is a succinct companion to the comprehensive textbook by T. Heather Herdman, Shigemi Kamitsuru, and Camila Lopes. The 12th edition is the definitive guide on nursing diagnoses as reviewed and approved by NANDA International. NANDA I, the leading professional organization that develops research, disseminates, and refines nursing taxonomy, designed this book to give current users of the full text a quick glance into what is new in the latest edition and more in-depth information on key changes. Six introductory chapters provide insightful commentary on changes including new nursing diagnoses, revisions to nursing diagnosis labels and diagnoses, and retired nursing diagnoses. The supplement also covers three types of clinical reasoning models: problem-focused nursing diagnosis, risk nursing diagnosis, and health promotion nursing diagnosis, which are enhanced by visual flow charts to give readers a better understanding of the essential steps required to make accurate diagnoses. Key Features: Structured documentation for each of the 46 new diagnoses introduced to the 12th edition, including presentation of a model case, model case assessment, and a tabular overview of the diagnostic parameters, ultimate goal, outcome, and nursing actions related to the model case. Explanation of standardized terminology changes used in nursing diagnostic indicators, including defining characteristics, related factors, and risk factors. Discussion of conceptual issues the authors anticipate will require additional clarification in the upcoming 13th edition, including recommendations for modification.
