Problems Of Calibration Of Absolute Magnitudes And Temperature Of Stars Symposium No 54:

Problems of calibration of absolute magnitudes and temperature of stars B. Hauck, B. E. Westerlund, 1973

Literature 1973, Part 2 Siegfried Böhme, Prof. Dr. Walter Fricke, Ulrich Güntzel-Lingner, Frieda Henn, Dietlinde Krahn, Ute Scheffer, Gert Zech, 2013-10-05 Astronomy and Astrophysics Abstracts which has appeared in semi annual volumes since 1969 is devoted to the recording summarizing and indexing of astronomical publications throughout the world It is prepared under the auspices of the International Astronomical Union according to a resolution adopted at the 14th General Assembly in 1970 Astronomy and Astrophysics Abstracts aims to present a comprehensive documentation of literature in all fields of astronomy and astrophysics Every effort will be made to ensure that the average time interval between the date of receipt of the original literature and publication of the abstracts will not exceed eight months This time interval is near to that achieved by monthly abstracting journals compared to which our system of accumulating abstracts for about six months offers the advantage of greater convenience for the user Volume 10 contains literature published in 1973 and received before March 15 1974 some older literature which was received late and which is not recorded in earlier volumes is also included We acknowledge with thanks contributions to this volume by Dr J Bouška who surveyed journals and publications in the Czech language and supplied us with abstracts in English and by the Commonwealth Scientific and Industrial Research

Organization C S I R O Sydney for providing titles and abstracts of papers on radio astronomy **Problems of Calibration of Absolute Magnitudes and Temperature of Stars** B. Hauck, B.E. Westerlund, 2012-12-06 In connection with arranging IAU Symposium No 50 on Spectral Classification and Multicolour Photometry sponsored by Commissions 45 and 25 it was decided to exclude all calibration problems Instead it was agreed that we should attempt to arrange a separate symposium dealing with the fundamental problems of the calibration of absolute magnitudes and temperatures of stars The Executive Committee of the IAU accepted our proposal and IAU Symposium No 54 was held in Geneva on September 12 15 1972 sponsored by the following IAU Commissions 24 25 29 33 35 37 44 and 45 It was attended by about 90 scientists representing 16 countries The Symposium was divided into eight sessions Each session started with a review paper by an invited speaker this was followed by a general discussion including a few contributed papers The contents of the present volume follow closely the programmes of the individual sessions of the Symposium Most of the recorded discussions have been kept and only in a few cases have the order of questions and comments been altered so as to obtain more homogeneity in the presentation **Transactions of the International Astronomical Union: Reports on Astronomy** C. de

Jäger, 2012-12-06 This volume contains the fifteenth tri annual reports of the Presidents of the forty Commissions of the International Astronomical Union it refers to the progress in our discipline during the three years 1970 1971 and 1972 As compared to earlier volumes a gradual change in character is unmistakable The ever increasing flow of publications combined with the obvious necessity to keep the Reports at a reasonable size and price level has gradually forced the

Commission Presidents to be more selective than before in drafting their Reports I have certainly stimulated them into that direction in order that Reports like these be valuable and lasting it seems imperative that the individual contributions have the character of a critical overall review where a fairly complete summary is given of the major developments and discoveries of the past three years and in which the broad developments and new trends be clearly outlined while at the same time essential problems for future research are identified With respect to the latter item I have suggested the Commission Presidents to add to their reports a brief section on scientific priorities for future research in the field of their Commissions In order to save space I have suggested to Commission Presidents that references to published papers are given on the basis of their number in the published issues of Astronomy and Astrophysics Abstracts For instance the indication 06 078 019 or AAA 06 078 **Nuclear Science Abstracts** ,1974-05 **Publications of the Astronomical Society of Japan** Nihon Tenmon Gakkai,1982 **Symposium** International Astronomical Union,1980 Transactions of the International Astronomical Union International Astronomical Union,1977 *Reports from the Observatory of Lund* Lunds universitet.
