Principles of Cognition, Language and Action N. Praetorius,2012-12-06 This book addresses a growing concern as to why Psychology now more than a hundred years after becoming an independent research area does not yet meet the basic requirements of a scientific discipline on a par with other sciences such as physics and biology These requirements include agreement on definition and delimitation of the range of features and properties of the phenomena or subject matter to be investigated secondly the development of concepts and methods which unambiguously specify the phenomena and systematic investigation of their features and properties A third equally important requirement implicit in the first two is exclusion from enquiry of all other matters with which the discipline is not concerned To these requirements must then be added the development of basic assumptions about the nature of what is under investigation and of principles to account for its properties and to serve as a guide as to what are relevant questions to ask and theories to develop about them

Dual-Aspect Monism and the Deep Structure of Meaning Harald Atmanspacher,Dean Rickles,2022-03-29 Dual Aspect Monism and the Deep Structure of Meaning investigates the metaphysical position of dual aspect monism with particular emphasis on the concept of meaning as a fundamental feature of the fabric of reality As an alternative to other positions mainly dualism physicalism idealism that have been proposed to understand consciousness and its place in nature the decompositional version of dual aspect monism considers the mental and the physical as two aspects of one underlying undivided reality that is psychophysically neutral Inspired by analogies with modern physics and driven by its conceptual

problems Wolfgang Pauli Carl Gustav Jung Arthur Eddington John Wheeler David Bohm and Basil Hiley are the originators of the approaches studied A radically novel common theme in their approaches is the constitutive role of meaning and its deep structure relating the mental and the physical to a psychophysically neutral base The authors reconstruct the formal structure of these approaches and compare their conceptual emphases as well as their relative strengths and weaknesses They also address a number of challenging themes for current and future interdisciplinary research both theoretical and empirical that arise from the presented frameworks of thinking Dual Aspect Monism and the Deep Structure of Meaning will be of interest to researchers and advanced students working in consciousness studies philosophy of mind philosophy of science philosophy of physics metaphysics and the history of 20th century philosophy and physics **Philosophical Foundations for a Christian Worldview** J.
