Problems Of The Pleistocene Epoch Volume :

Problems of the Pleistocene Epoch and Arctic Area, 1959 *Frederic W. Harmer: A Scientific Biography* John A. Kington, 2014-06-25
Comprising the first definitive account of the geological and palaeometeorological studies made by the British geologist Frederic W Harmer 1835 1924 this book contributes a previously missing chapter to the history of science The main objective of the author is to ensure that the scientific work of Harmer which unfortunately has been widely neglected or forgotten becomes more generally known and acknowledged The balance of this deficiency will be redressed by bringing to light in this volume his contributions to the history of science to an audience of academic and lay readers of the current literature **Climatic Change in Canada** Charles Richard Harington, 1980 Syllogeus, 1984 Climatic Change in Canada 4 Charles Richard Harington, 1984 Standing between Life and Extinction David L. Propst, Jack E. Williams, Kevin R. Bestgen, Christopher W. Hoagstrom, 2021-02-15
North American deserts lands of little water have long been home to a surprising diversity of aquatic life from fish to insects and mollusks With European settlement however water extraction resource exploitation and invasive species set many of these native aquatic species on downward spirals In this book conservationists dedicated to these creatures document the history of their work the techniques and philosophies that inform it and the challenges and opportunities of the future A precursor to this book Battle Against Extinction laid out the scope of the problem and related conservation activities through the late 1980s Since then many nascent conservation programs have matured and researchers have developed new technologies improved and refined methods and greatly expanded our knowledge of the myriad influences on the ecology and dynamics of these species Standing between Life and Extinction brings the story up to date While the future for some species is more secure than thirty years ago others are less fortunate Calling attention not only to iconic species like the razorback sucker Gila trout and Devils Hole pupfish but also to other fishes and obscure and fascinating invertebrates inhabiting intermittent aquatic habitats this book explores the scientific social and political challenges of preserving these aquatic species and their habitats amid an increasingly charged political discourse and in desert regions characterized by a growing human population and rapidly changing climate
