**Trade, Food, Diet and Health** Corinna Hawkes, Chantal Blouin, Spencer Henson, Nick Drager, Laurette Dubé, 2009-10-29 The global shift towards overweight and obese populations has led to a significant rise in diet related chronic illness This book examines the role global food trade has played in that shift looking carefully at how the trade of food across national borders international and regional trade agreements the process of trade and investment liberalization and the growth of transnational food corporations affects what people eat and by implication their health An international team of editors has brought together a prestigious group of contributors who present a critical analysis of the linkages between trade food and diet in different domains Between them the multidisciplinary group present a balanced perspective on the opportunities and risks trade poses for dietary trends and offer a practical analysis of the policy options available to address this growing global concern An international multidisciplinary team of authors Detailed look at the issues followed by practical policy analysis A comprehensive review of an important global issue Academics researchers and practitioners in the field of public health especially those concerned with nutrition obesity and chronic disease will find this book an enlightening and fascinating read Social scientists policy makers trade analysts and food industry professionals will equally gain much from this innovative

approach to the subject      **Transnational Narratives and Regulation of GMO Risks** Giulia Claudia Leonelli, 2021-11-04

This book provides an innovative insight into the regulatory conundrum of genetically modified organisms (GMOs) deploying transnational legal analysis as a methodological framework to explore the most controversial area of risk governance. The book deconstructs hegemonic and counter-hegemonic transnational narratives on the governance of GMO risks, cutting across US law, EU law, the WTO Agreement on Sanitary and Phytosanitary Measures, and hybrid standard setting regimes. Should uncertain risks be run unless adverse effects have been conclusively established and should regulators only act where this is cost-benefit effective? Should risk managers make a convincing case that a product or process is safe enough for the relevant uncertain risks to be socially acceptable? How can intractable transnational regulatory conflicts be solved? The book complements a close analysis of regulatory frameworks and case law with a more encompassing perspective on the political, socio-economic, and distributional implications of different approaches to the regulation of health and environmental risks at times of globalisation. The GMO deadlock thus becomes a lens through which to investigate the underlying value systems, goals, and impacts of transnational discourses on risk governance. Against this backdrop, the normative strand of analysis points to the limited ability of science and procedural deliberation to generate authentic agreement and to identify normatively legitimate solutions in the absence of pre-existing shared perspectives.
