Private Sector After Communism:

The Private Sector after Communism Vladimir Banacek, Mihaly Laki, Jan Winiecki, 2004-06-01 The transformation of state owned enterprises into privately owned ones is commonly referred to as privatization Just as important as this process though sometimes not given the attention it deserves and requires is the establishment and expansion of new private firms This book analyzes new entrepreneurial firms that emerge and occasionally flourish after a period of state communism has come to an end The authors rightly focus on the aftermath of the end of communism by looking first at the inevitable output decline followed by an overview of new entrepreneurial firms Specific East European examples are examined and the lessons which can be learned from these will interest academics and policy makers alike Committed and knowledgeable authors in this book treat the sometimes emotive issue of transition developing economies maturely and expertly The result is a volume which will interest scholars with an interest in transition economics and politics as well as those who actively work in transition economies

Enterprise and Social Benefits After Communism Martin Rein, Barry L. Friedman, Andreas Wörgötter, 1997-07-17 This 1997 book examines the evolution of firm initiated social benefits in Central East European Countries and the former Soviet Union

Transforming Post-Communist Political Economies National Research Council, Division of Behavioral and Social Sciences and Education, Commission on Behavioral and Social Sciences and Education, Task Force on Economies in Transition, 1998-03-02 This ground breaking new volume focuses on the interaction between political social and economic change in Central and Eastern Europe and the New Independent States It includes a wide selection of analytic papers thought provoking essays by leading scholars in diverse fields and an agenda for future research It integrates work on the micro and macro levels of the economy and provides a broad overview of the transition process This volume broadens the current intellectual and policy debate concerning the historic transition now taking place from a narrow concern with purely economic factors to the dynamics of political and social change It questions the assumption that the post communist economies are all following the same path and that they will inevitably develop into replicas of economies in the advanced industrial West It challenges accepted thinking and promotes the utilization of new methods and perspectives

Democracy After Communism Larry Diamond, Marc F. Plattner, 2002-09-23 The last quarter of the twentieth century was marked by two dramatic political trends that altered many of the world s regimes the global resurgence of democracy and the collapse of communism Was the process that brought down communism in Eastern Europe and the former Soviet Union fundamentally different from the process that gave birth to new democracies in other regions of the world Were the transitions away from communism mostly like or mostly unlike the transitions away from authoritarianism that took place elsewhere Is the challenge of building and consolidating democracy under postcommunist conditions unique or can one apply lessons learned from other new democracies The essays collected in this volume explore these questions while tracing how the countries of Eastern Europe and the former Soviet Union have fared in the decade

 Olivier Jean Blanchard, Kenneth A. Froot, Jeffrey D. Sachs, 2007-12-01 When communism fell in 1989 the question for most

 Volumes 1 and 2 is an analysis of the experiences of various countries making the transition to market economies and
 examines the most important challenges still in store Volume 1 Country Studies gives an in depth country by country analysis
 of various reform experiences including historical backgrounds and discussions of policies and results to date The countries
 analyzed are Poland Czechoslovakia Hungary eastern Germany Slovenia and Russia Written by leading economists some of

 solutions to the problems of economic transition Volume 2 Restructuring focuses on specific issues of transition including
 how to design labor market institutions privatization new fiscal structures and bankruptcy laws how to reorganize foreign
 trade and how to promote foreign direct investment The articles written by experts in the field will be of direct help to those

 policymakers in Eastern Europe and in western countries for international agencies concerned with the transition process
