Destinies of the Disadvantaged Frank F. Furstenberg, 2007-11-15 Teen childbearing has risen to frighteningly high levels over the last four decades jeopardizing the life chances of young parents and their offspring alike particularly among minority communities Or at least that's what politicians on the right and left often tell us and what the American public largely believes But sociologist Frank Furstenberg argues that the conventional

wisdom distorts reality In *Destinies of the Disadvantaged* Furstenberg traces the history of public concern over teen pregnancy exploring why this topic has become so politically powerful and so misunderstood Based on over forty years of Furstenberg's research on teen childbearing *Destinies of the Disadvantaged* relates how the issue emerged from obscurity to become one of the most heated social controversies in America Both slipshod research by social scientists and opportunistic grandstanding by politicians have contributed to public misunderstanding of the issue Although out of wedlock teen pregnancy rose notably between 1960 and 1990 a cause for concern given the burdens of single motherhood at a young age this trend did not reflect a rise in the rate of overall teen pregnancies In fact teen pregnancy actually declined dramatically in the 1960s and 1970s The number of unmarried teenage mothers rose after 1960 not because more young women became pregnant but because those who did increasingly chose not to rush into marriage Furstenberg shows how early social science research on this topic exaggerated the adverse consequences of early parenthood both for young parents and for their children Researchers also inaccurately portrayed single teenage motherhood as a phenomenon concentrated among minorities Both of these misapprehensions skewed subsequent political debates The issue became a public obsession and remained so during the 1990s even as rates of out of wedlock teen childbearing plummeted Addressing teen pregnancy was originally a liberal cause led by advocates of family planning services legalized abortion and social welfare programs for single mothers The issue was later adopted by conservatives who argued that those liberal remedies were encouraging teen parenthood According to Furstenberg the flexible political usefulness of the issue explains its hold on political discourse The politics of teen parenthood is a fascinating case study in the abuse of social science for political ends In *Destinies of the Disadvantaged* Furstenberg brings that tale to life with the perspective of a historian and the insight of an insider and provides the straight facts needed to craft effective policies to address teen pregnancy

Class in America Robert E. Shopping Our Way to Safety Andrew Szasz,2007-11-15 Not long ago people did not worry about the food they ate They did not worry about the water they drank or the air they breathed It never occurred to them that eating drinking water satisfying basic mundane bodily needs might be a dangerous thing to do Parents thought it was good for their kids to go outside get some sun That s all changed now from the Introduction Many Americans today rightly fear that they are constantly exposed to dangerous toxins in their immediate environment tap water is contaminated with chemicals foods contain pesticide residues hormones and antibiotics even the air we breathe outside and indoors carries invisible poisons Yet we have responded not by pushing for governmental regulation but instead by shopping What accounts for this swift and dramatic response And what are its unintended consequences Andrew Szasz examines this phenomenon in Shopping Our Way to Safety Within a couple of decades he reveals bottled water and water filters organic food green household cleaners and personal hygiene products and natural bedding and clothing have gone from being marginal niche commodities to becoming mass consumer items Szasz sees these fatalistic individual responses to collective environmental threats as an inverted form of quarantine aiming to shut the healthy individual in and the

threatening world out Sharply critiquing these products effectiveness as well as the unforeseen political consequences of relying on them to keep us safe from harm Szasz argues that when consumers believe that they are indeed buying a defense from environmental hazards they feel less urgency to actually do something to fix them To achieve real protection real security he concludes we must give up the illusion of individual solutions and together seek substantive reform Andrew Szasz is professor and chair of the department of sociology at the University of California at Santa Cruz and author of the award winning *EcoPopulism* Minnesota 1994 [Race, Ethnicity, and Inequality in the U.S. Labor Market](#) George Wilson, 2007-03-26 What patterns of racial and ethnic stratification are emerging in the American labor market as representation of racial and ethnic minorities continues to increase in the new millennium The articles in this special volume of *The Annals* demonstrate that in the 21st century the labor market is neither race neutral nor color blind Race and ethnicity continue as salient factors in determining life chance opportunities in the American labor market The volume focuses on the range of issues sociologists are addressing as they explore racial and ethnic inequality in the labor market It also examines the methodological strategies used to analyze the subtle dynamics associated with inequality in the labor market Taken together these articles move us ahead in understanding the incidence causes and consequences of persisting inequities

Race Relations in America Thomas J. Davis, 2006-03-30 Presents primary documents to support an exploration of race relations in the United States from 1785 to the present **The Impact of Globalization on the United States: Culture and society** Michelle Bertho, Beverly Crawford, Edward A. Fogarty, 2008 This is the first work to systematically demystify the impact of globalization on the United States and American society in particular turning the tables on the more familiar idea of America as the nefarious globalizer of the developing world **Motherhood, Poverty, and the WIC Program in Urban America** Suzanne Morrissey, 2015-12-24 The study presented here is one of urban poverty household survival and social institutions that both enable and control the decision making of poor women in America First and foremost it is about a public health program the Special Supplemental Nutrition Program for Women Infants and Children known more commonly as WIC and how the institution re inscribes persistent stereotypes of the urban poor on the women it eagerly wishes to serve Despite encountering opposition and occasionally humiliation at the hands of those chosen to serve many low income women throughout the United States and Puerto Rico return to WIC every month because it represents a rite of passage that characterizes pregnancy Enrolling in WIC prenatally signifies to others the importance of providing for one's family in spite of socioeconomic disadvantage Yet whether women access WIC benefits or not their lived realities include a painful and enduring connection between urban poverty and health inequalities particularly inequalities leading to poor birth outcomes and infant mortality as explored in this urban ethnography **Black in America** Enobong Hannah Branch, Christina Jackson, 2020-01-22 At the start of the twentieth century the pre eminent black sociologist W E B DuBois identified the color line as America's great problem While the color line is increasingly variegated beyond black and white and more openly

discussed than ever before as more racial and ethnic groups call America home his words still ring true Today post racial and colorblind ideals dominate the American narrative obscuring the reality of racism and discrimination hiding if only temporarily the inconvenience of deep racial disparity This is the quintessential American paradox our embrace of the ideals of meritocracy despite the systemic racial advantages and disadvantages accrued across generations This book provides a sociology of the Black American experience To be Black in America is to exist amongst myriad contradictions racial progress and regression abject poverty amidst profound wealth discriminatory policing yet equal protection under the law This book explores these contradictions in the context of residential segregation labor market experiences and the criminal justice system among other topics highlighting the historical processes and contemporary social arrangements that simultaneously reinforce race and racism necessitating resistance in post civil rights America
