Problem Of Consciousness Essays Towards A Resolution:

The Problem of Consciousness Colin McGinn, 1991 Addresses the problem of consciousness in a material world The author argues that a belief in consciousness does not undermine atheistic naturalism despite the fact that consciousness cannot presently be explained by the physical sciences The problem he says is a conceptual one **Wenn nicht im Kopf, wo dann?** Marcus Birke, 2001 The Reflexive Nature of Consciousness Greg Janzen, 2008-03-27 Combining phenomenological insights from Brentano and Sartre but also drawing on recent work on consciousness by analytic philosophers this book defends the view that conscious states are reflexive and necessarily so i.e. that they have a built in implicit awareness of their own occurrence such that the subject of a conscious state has an immediate non objectual acquaintance with it As part of this investigation the book also explores the relationship between reflexivity and the phenomenal or what it is like dimension of conscious experience defending the innovative thesis that phenomenal character is constituted by the implicit self awareness built into every conscious state This account stands in marked contrast to most influential extant theories of phenomenal character including qualia theories according to which phenomenal character is a matter of having phenomenal sensations and representationalism according to which phenomenal character is constituted by representational content Series A **The Problem of Consciousness**, 1993 *Actual Consciousness* Ted Honderich, 2014-07-10 What is it for you to be conscious There is no agreement whatever in philosophy or science it has remained a hard problem a mystery Is this partly or mainly owed to the existing theories not even having the same subject not answering the same question In *Actual Consciousness* Ted Honderich sets out to supersede dualisms objective physicalisms abstract functionalism externalisms and other positions in the debate He argues that the theory of Actualism right or wrong is unprecedented in nine ways 1 It begins from gathered data and proceeds to an adequate initial clarification of consciousness in the primary ordinary sense This consciousness is summed up as something's being actual 2 Like basic science Actualism proceeds from this metaphorical or figurative beginning to what is wholly literal and explicit constructed answers to the questions of what is actual and what it is for it to be actual 3 In so doing the theory respects the differences of consciousness within perception consciousness that is thinking in a generic sense and consciousness that is generic wanting 4 What is actual with your perceptual consciousness is a subjective physical world out there very likely a room differently real from the objective physical world that other division of the physical world 5 What it is for the myriad subjective physical worlds to be actual is for them to be subjectively physical which is exhaustively characterized 6 What is actual with cognitive and affective consciousness is affirmed or valued representations The representations being actual which is essential to their nature is their being differently subjectively physical from the subjective physical worlds 7 Actualism naturally enough when you think of it but unlike any other existing general theory of consciousness is thus externalist with perceptual consciousness but internalist with respect to cognitive and affective consciousness 8 It satisfies rigorous criteria got from examination of

the failures of the existing theories In particular it explains the role of subjectivity in thinking about consciousness including a special subjectivity that is individuality 9 Philosophers and scientists have regularly said that thinking about consciousness requires just giving up the old stuff and starting again Actualism does this Science is served by this main line philosophy which is concentration on the logic of ordinary intelligence clarity consistency and validity completeness generality The Problem of Consciousness Evan Thompson,2003 Contributors to the latest Canadian Journal of Philosophy Supplementary Volume The Problem of Consciousness make connections regarding what is consciousness and how it is related to the natural world The essays in this volume address this question from the perspective of phenomenological philosophy of mind a new trend that integrates phenomenology analytic philosophy and cognitive science The guiding principle of this new thinking is that precise and detailed phenomenological accounts of subjective experience are needed if significant progress is to be made in understanding consciousness and its place in the natural world From this standpoint the essays collected here explore a variety of nuances concerning consciousness including time consciousness perception schizophrenia empathy and intersubjectivity Also addressed are fascinating methodological issues about the relationship between phenomenology and other approaches to understanding the mind in science and philosophy Conscious Experience Thomas Metzinger,1995 The contributions to this book are original articles representing a cross section of current philosophical work on consciousness and thereby allowing students and readers from other disciplines to acquaint themselves with the very latest debate so that they can then pursue their own research interests more effectively The volume includes a bibliography on consciousness in philosophy cognitive science and brain research covering the last 25 years and consisting of over 1000 entries in 18 thematic sections compiled by David Chalmers and Thomas Metzinger *Perspektiven der Transzendentalphilosophie* Reinhard Hiltcher,André Georgi,2002 **Logical Analysis and History of Philosophy** ,2006 *Allgemeine Zeitschrift für Philosophie* ,1997 **Analytische Theorien des Selbstbewusstseins** Manfred Frank,1994 **Die Öffentlichkeit der Vernunft und die Vernunft der Öffentlichkeit** Lutz Wingert,Klaus Günther,2001 *Erkenntnis und Gehirn* Reiner Hedrich,1998 *Zeichen der Wirklichkeit* Günter Abel,2004 **Die Erklärbarkeit von Erfahrung** Ursula Renz,2010 Subjekt und Selbstmodell Thomas Metzinger,1993 Philosophische Rundschau ,1998 *Interpretationskonstrukte* Hans Lenk,1993 *The Metaphysics of Consciousness* Pierfrancesco Basile,Julian Kiverstein,Pauline Phemister,2010-08-05 This new collection of essays brings together leading contemporary philosophers of mind to re examine the key question what is consciousness **Current Issues in Theoretical Philosophy** Richard Schantz,2004
