Vygotsky's

Notebooks Ekaterina Zavershneva, René van der Veer, 2018-01-24 This book consists of previously unpublished manuscripts

by Vygotsky found in the first systematic study of Vygotsky's family archive. The notebooks and scientific diaries gathered in this volume represent all periods of Vygotsky's scientific life beginning with the earliest manuscript entitled 'The tragicomedy of strivings' 1912 and ending with his last note entitled 'Pro domo sua' 1934 written shortly before his death. The notes reveal unknown aspects of the eminent psychologist's personality, show his aspirations and interests, and allow us to gain insights into the development of his thinking and its internal dynamics. Several texts reflect the plans that Vygotsky was unable to realize during his lifetime, such as the creation of a theory of emotions and a theory of consciousness; others reveal Vygotsky's involvement in activities that were previously unknown, and still others provide outlines of papers and lectures. The notes are presented in chronological order, preceded by brief introductions and accompanied by an extensive set of notes. The result is a book that allows us to obtain a much deeper understanding of Vygotsky's innovative ideas.

Using Empathy Coaching to Improve Interpersonal Relationships at Work William J. Rothwell, Jamie Campbell, Phillip L. Ealy, Behnam

Bakhshandeh, 2025-09-09 Meaningful human interaction requires empathy, the ability to understand and share another's feelings. It promotes genuine connections, compassion, and social cohesion. Sympathy involves acknowledging another's hardships from your perspective, often leading to pity rather than a shared emotional experience. The difference between empathy and sympathy is key. Sympathy makes you a compassionate observer, but empathy immerses you in another's experience, deepening understanding and connection. Sympathy disconnects, but empathy connects. Increased social isolation, digital dependence, and polarization are to blame. Screen time and online interactions can sometimes hinder emotional intelligence and empathy. Social polarization makes it hard to empathize with opposing views. A lack of empathy can cause society to suffer discrimination and show a lack of compassion. It also makes working with others, especially those with different views, harder. How can individuals be helped to demonstrate more empathy? That question has provoked much thought among business leaders, government leaders, social activists, and workers. This book sheds light on that question.
