

The Empirical Knowledge

Empirical knowledge, also known as empirical evidence, is information gained through direct observation, personal experience, or sensory perception.

It relies on practical, hands-on encounters with the world rather than theoretical or abstract reasoning. **Empirical knowledge** is often informal and based on everyday experiences.

While it lacks the systematic methodology of scientific inquiry, it plays a crucial role in shaping individual understanding and decision-making. This type of knowledge is subjective and context-dependent, reflecting the unique perspectives and interpretations of individuals based on their direct interactions with the surrounding environment.
