Brennan,1977 **Problems of the Arctic and the Antarctic** ,1989 **Northern Sea Route and Icebreaking Technology** Nathan D. Mulherin,D. S. Sodhi,Elisabeth Smallidge,1994 The Northern Sea Route NSR follows the Eurasian coastline between the Atlantic and Pacific oceans The USSR developed a marine transportation infrastructure along their northern coastline that includes a fleet of the world s most powerful icebreakers and ice strengthened cargo ships port facilities and navigation communication and environmental forecasting aids In 1987 the USSR announced it would open the NSR to foreign vessels for peaceful and commercial purposes Navigational difficulties are considerable due to bitter weather conditions the short daylight season iceinfested waters and isolation However shorter distances between north Pacific and European ports an existing cargo base a currently underutilized transportation infrastructure potential stimulation and strengthening of the Russian economy and the prospect for economic benefits from international investment in Russia make the NSR attractive The challenging physical environment requires advances in ship design and ship operations Modern polar ships are larger stronger and more powerful their propulsion systems have been improved and the resistance encountered during icebreaking has been reduced The existing shallow draft northern fleet may be undesirable for use where larger ships can move cargo more efficiently More northerly route options would enable larger and perhaps more efficient ship passage but would also require greater icebreaking capabilities however it win be difficult to attract greater foreign interest unless the navigation season can be extended Glaciological Data ,1993 **Government Reports Announcements & Index** ,1990-04 Zeitschrift für Gletscherkunde und Glazialgeologie ,1980 **The Journal of Glaciology** ,1974 *Construction in Cold Regions* Terry T. McFadden,F. Lawrence Bennett,1992-04-16 Written as a reference on effective engineering practice for construction activities in Arctic and Sub Arctic regions It is based on many sources around the world including the Soviet Union and China where people live and work in very low temperatures Provides a broad look at overall problems found by engineers contractors and builders including case histories that illustrate actual projects throughout the cold regions of the world
