Special Issue: Social Neutrosophy in Latin America](#) Florentin Smarandache, Mohamed Abdel-Basset, Maikel Leyva Vazquez, The Latin American Neutrosophic Science

Association was created in 2018 as a result of the initiative of a group of university professors from Mexico and Ecuador. The Association has developed an intense work in the investigative context, expressing the capacity that neutrosophy has as a tool for understanding and transformation of reality in social benefit. Neutrosophic sets as a generalization of fuzzy sets, especially intuitionistic fuzzy sets, allows handling a greater number of situations that occur in reality and becomes a facilitator of the approach to the studied object without undermining its complex and multivariate essence. In this special edition, researchers from six Ecuadorian universities show the results of research projects addressing a wide range of topics related to the social environment of these Higher Education Institutions. The contents include law, criminology, public and administrative management, evaluation of pedagogical scenarios, prospective analysis, artificial intelligence, among other topics. They are many different texts with a common denominator: the social sciences and their relationship with neutrosophy. The progress of these investigations originates a significant change in the ways of validating and reasoning the proposals; the appreciation of neutrality increases the interpretability and the inferential efficacy from the analysis of the results, which enunciates a methodological perceptive and objective enrichment in the humanistic sciences in Latin American geographical region.

Revitalizing the Jamaican Economy Inter-American Development Bank, 2004. *Problems of Poverty* John A. Hobson, 2005-09-01. The first condition of sweating is an abundant and excessive supply of low skilled and inefficient labour. It needs no parade of economic reasoning to show that where there are more persons willing to do a particular kind of work than are required, the wages for that work, if free competition is permitted, cannot be more than what is just sufficient to induce the required number to accept the work. In other words, where there exists any quantity of unemployed competitors for low skilled work, wages, hours of labour and other conditions of employment are so regulated as to present an attraction which just outweighs the alternatives open to the unemployed: viz. odd jobs, starving and the poor house.
