Biomechanics: Current Interdisciplinary Research S.M. Perren,E. Schneider,2012-12-06 The papers presented at the Fourth Meeting of the European Society of Biomechanics held in collaboration with the European Society for Biomaterials in late September 1984 in Davos Switzerland are published herewith The main idea of the meeting was to gather together the many disciplines of researchers and clinicians active and interested in promoting biomechanical knowledge in one interdisciplinary society the European Society of Biomechanics We feel that the dialog across the disciplines is one of the important goals of the society a goal which can be furthered by meetings like the one in Davos A surgeon whether a general trauma or orthopaedic surgeon is normally brought up without relevant exposure to specific technical problems It therefore is not surprising that he speaks a different language with respect to mechanical problems than an engineer Although a surgeon often has a feeling for what the solution to a particular problem might be a fruitful interdisciplinary collaboration is made difficult by this scientific language barrier On the other hand a physicist chemist engineer and metallurgist to name a few would do well with a realistic perception of the possibilities and limitations of surgery and of the relevance of a solution found to the initial question Similar problems exist in other areas e.g. in the field of sports biomechanics in the dialogue between coach and researcher Interdisciplinary misunderstandings have led to quite some unnecessary frustration in the past **Biomechanics** Gert de Groot,Hideji Matsui,David A.
