Proceedings of the Fourth European Conference on Mathematics in Industry U. Wacker, Walter Zulehner, 2012-12-06 The Fourth ECMI Conference on Industrial Mathematics took place at Strobl in Austria May 29 June 2 1989 The conference was devoted to the exchange of ideas models and methods from various fields of industrial applications of mathematics About 140 people from 21 countries attended the meeting The aim was to bring together people from industry and from university In this respect the organizers were only partly successful The participation of about 20 people from industry shows that there is still much work to be done to increase the acceptance from this side 72 speakers presented their results as invited or contributed lectures or in the frame of 2 minisymposia One minisymposium was organized by Heinz W Engl and focused on steel processing the other one organized by Hansjörg Wacker dealt with chemical engineering These proceedings consist of 56 papers The articles within each of the sections Invited Lectures Minisymposium Steel Processing Minisymposium Chemical Engineering and Contributed Lectures are in alphabetical order of the first author Except for the contributions to the minisymposia which clearly concentrate on the corresponding topics it is hard to find a reasonable classification of the papers This we believe is typical for industrial mathematics and underlines the vast variety of fields where mathematics could be used to support problem solving We would like to acknowledge the valuable work of the referees of the articles who certainly helped to improve the quality of this volume
