Marketing Case Studies in Emerging Markets Dilip S. Mutum, Soo Yeong Ewe, Ezlika M. Ghazali, Racheal Louis Vincent, 2024-04-01 There is an increasing interest in emerging markets because of the higher economic growth rates compared to developed economies. However, these markets have a diverse consumer base with unique needs and preferences. As a result, companies in these markets face different challenges and opportunities. Unfortunately, there is a lack of marketing cases from these markets. This book presents actual real world marketing cases in these markets, offering an in-depth look at some of the issues faced by companies in different industries. It is hoped that the cases would serve as valuable reference material for academics, students, professionals in marketing, business strategy, and other related fields, as well as policymakers to better understand the challenges of these markets and develop strategies to succeed in them. **Riding the Energy**

Transition Reda Cherif, Fuad Hasanov, Aditya Pande, 2017-05-22 Recent technological developments and past technology transitions suggest that the world could be on the verge of a profound shift in transportation technology. The return of the electric car and its adoption, like that of the motor vehicle in place of horses in early 20th century, could cut oil consumption substantially in the coming decades. Our analysis suggests that oil, as the main fuel for transportation, could have a much shorter life span left than commonly assumed. In the fast adoption scenario, oil prices could converge to the level of coal prices about 15 per barrel in 2015 prices by the early 2040s. In this possible future, oil could become the new coal.

Non-Petroleum Automotive Transportation Carl Arthur MacCarley, 2025-07-17 Non-Petroleum Automotive Transportation addresses the broad topic of energy and environmental sustainability for automotive transportation in a balanced, comprehensive, and readable way. Readers will gain a basic understanding of the characteristics, advantages, and limitations of all viable alternatives to fossil fuels, as well as the basics of internal combustion engines. Fuels include ethanol, methanol, hydrogen, biodiesel, biomethane, natural gas, ammonia, dimethyl ether, and synthetic e-Fuels, and methods to calculate the carbon emissions and power output limits for each are covered. The technologies' operation efficiency and overall emissions of battery electric, hybrid electric, and hydrogen fuel cell vehicles will be analyzed and compared with all other vehicle fueling options. Also covered are the fueling and charging infrastructure, challenges, energy resource requirements, indirect environmental impacts, safety, and economic ramifications of the transition from gasoline and diesel fuel to electric and renewable fuels. The interdependence of transportation with solar, wind, electric energy storage, and emerging renewable energy sources is discussed. The book concludes with an overview of the effect of incentives and carbon credits on the direction of automotive energy and suggestions for future career and investment opportunities enabled by this revolution.

Cross-Cultural Business Simon Glandien, 2020-11-18 Academic Paper from the year 2020 in the subject Business economics Business Management Corporate Governance grade A course Cross Cultural Business language English abstract The purpose of this paper is to analyze and evaluate the market entry of Tesla Inc in Germany In November 2019 Tesla revealed to build a European production plant on the outskirts of Berlin in Germany The aim of this paper is to give account to the foreign market entry of Tesla Inc in Germany This leads to the following research question that guides this paper What could be business success factors and threats of Tesla's strategy to enter the German automotive industry market Tesla Inc former Tesla Motors Inc is a car manufacturer and sells fully electric vehicles energy storage systems as well as installs operates and maintains solar and energy storage products Reuters n d The company was founded in 2003 by a group of engineers In 2008 Tesla launched their first electric vehicle to the market Tesla n d Tesla's mission is to accelerate the world's transition to sustainable energy so the car manufacturer So far most of the Tesla vehicles are produced and assembled in the United States at its main Tesla Factory in Fremont California To that Tesla operates other multiple production and assembly plants named Gigafactory such as in Fremont California Giga Nevada and in Buffalo New York Giga New York Recently in 2019 Tesla opened its first Gigafactory outside the American region in Shanghai China Giga Shanghai A strategic step to internationalize the company and to enter the Chinese market This strategic action can be explained by the fact that China is the largest car market in the world and the government is speeding up the expansion of electric mobility Furthermore manufacturing in Shanghai saves Tesla from having to transport its vehicles overseas and avoids import duties incurred in China for cars from the United States However the company is not just expanding its manufacturing into China

The Business Week, 2007-07 Automotive Industry Analysis. The Chinese and American Market, Competitors Jan Kachelmaier, 2017-07-17 Research Paper undergraduate from the year 2016 in the subject Business economics Industrial Management grade 3 7 93% California State University Fullerton language English abstract The paper analysis the automotive industry in general as well as the relative position of the Volkswagen AG Furthermore VW's competitors are assessed and recommendations for actions are formulated In the beginning the creation of the automobile seemed less of a need and more of a luxury as the cars could only be afforded by the well off The very first steam car took to the road in France in 1768 but Cugnot's novel idea did not trigger the beginning of the car industry After Henry Ford's model made its debut owning a car was a symbol of status because it could only be afforded by the wealthy Once the process of Henry Ford's mass production was introduced cars could be afforded by a wider dynamic of people and ownership became an affordable growing trend The production of automobiles was a great help to the economy It provided jobs across industries including positions in steel and machine tool makers for the different metal parts of the car The increase in the need of supplies and other parts of the car including the battery head lights paint and interior upholstery were the driving forces for new businesses to thrive Cars being a part of the everyday norm meant they would need routine car maintenance which became a

major source of business This also led to the increase of petroleum sales as the demanded use of cars increased When WWII came the US was able to use the jeep for military use additionally Chrysler reworked the jeep design to create tanks Moreover car production in Europe turned its focus from the people s car to cars designed for the military *Electrical Review* ,1886 **An Electric Vehicle Conversion Start-Up.
