Practices of Comparing Angelika Eppler, Walter Erhart, Johannes Grave, 2020-06-22 Practices of comparing shape how we perceive organize and change the world. Supposedly innocent practices of comparing play a decisive role in forming categories boundaries and hierarchies but they can also give an impetus to question and change such structures. Like almost no other human practice comparing pervades all social political economic and cultural spheres. This volume outlines the program of a new research agenda that places comparative practices at the center of an interdisciplinary exploration. Its contributions combine case studies with overarching systematic considerations. They show what insights can be gained and which further questions arise when one makes a seemingly trivial practice comparing the subject of in depth research.

Analytics Francisco J. Cantu-Ortiz, 2017-10-25 The growth of machines and users of the Internet has led to the proliferation of all sorts of data concerning individuals institutions companies governments universities and all kinds of known objects and events happening everywhere in daily life. Scientific knowledge is not an exception to the data boom. The phenomenon of data growth in science pushes forth as the number of scientific papers published doubles every 9.15 years and the need for methods and tools to understand what is reported in scientific literature becomes evident. As the number of academicians and innovators swells so do the number of publications of all types yielding outlets of documents and depots of authors and institutions that need to be found in Bibliometric databases. These databases are dug into and treated to hand over metrics of research performance by means of Scientometrics that analyze the toil of individuals institutions journals countries and even regions of the world. The objective of this book is to assist students professors university managers government industry and stakeholders in general understand which are the main Bibliometric databases what are the key research indicators and who are the main players in university rankings and the methodologies and approaches that they employ in producing ranking tables. The book is divided into two sections. The first looks at Scientometric databases including Scopus and Google Scholar as well as institutional repositories. The second section examines the application of Scientometrics to world class universities and the role that Scientometrics can play in competition among them. It looks at university rankings and the methodologies used to create these rankings. Individual chapters examine specific rankings that include QS World University Scimago Institutions Webometrics U Multirank U S News World Report. The book concludes with a discussion of university performance in the age of research analytics. **Collection Evaluation in Academic Libraries** Karen C. Kohn, 2015-06-24

Librarians have long used data to describe their collections Traditional measures have simply been inputs and outputs volumes acquired processed owned or circulated With the growth since the 1990s of cultures of assessment librarians have sought statistics that are evaluative rather than simply descriptive More recently exponentially increasing journal prices and an economic recession have intensified the need to make careful purchasing decisions and to justify these to administrators A methodical evaluation of a library collection can help librarians understand and meet user needs and can help communicate to administrators that the library is a good use of the institution's money Collection Evaluation in Academic Libraries A Practical Guide for Librarians equips collections managers to select and implement a method or several methods of evaluating their library collections It includes sections on four tools for evaluation Comparison to peer institutions Core lists Usage statistics from circulation and ILL Citation analysis Chapters on each of these approaches present the advantages and disadvantages of each method instructions on data collection and analysis with screenshots and suggested action steps after completing the analysis With a unique combination of step by step instructions and discussions of the purpose and role of data this book provides an unusually thorough guide to collection evaluation It will be indispensable for collection development librarians and anyone looking to strengthen the culture of assessment within the library **The Best Southeastern Colleges** Princeton Review (Firm),2003 The Truth About Colleges from the REAL Experts Current College Students Inside this book you'll find profiles of 100 great colleges in the Southeast including schools you've heard about and great colleges that aren't as widely recognized There is simply no better way to learn about a college than by talking to its students so we asked thousands of them to speak out about their schools Sometimes hilarious often provocative and always telling the students' opinions will arm you with rare insight into each college's academic load professors libraries dorms social scene and more A Comparison of Two Methods of College Instruction Norma Valentine Scheidemann,1927 The North American Review Jared Sparks,Edward Everett,James Russell Lowell,Henry Cabot Lodge,1875 Vols 277 230 no 2 include Stuff and nonsense v 5 6 no 8 Jan 1929 Aug 1930 **The North American Review** ,1875 Nonparametric Ranking Procedures for Comparison with a Control Stanford University.
