Remote Jobs Uber Usa:

The Future of Work in the United States Natalie Rauscher, 2021-09-03 This book presents and analyzes how restructuring processes due to technological change are reflected and processed in political and public discourses in the United States in the most recent past More specifically this work examines how the themes of automation digitization and the platform economy and their impact on the future of work are reflected in public discourse through the analysis of journalistic articles and political discourse through the analysis of congressional hearings Public and political discourses as well as economic narratives shape our understanding of certain developments such as technological change our behavior more generally and societal support of said developments Therefore it is vital to investigate and analyze these discourses in order to show how technological change is perceived and evaluated today This work draws from concepts and methods of several different disciplines most notably using a combination of corpus linguistic methods and exemplary textual analysis This way this work stands as truly interdisciplinary with a unique approach to the quantitative and qualitative examination of discourses

Managerial Control of American Workers Mel van Elteren, 2017-03-04 Today surveillance and regulation of employees are pervasive at all levels except the highest in a wide variety of American workplaces Digital information systems have become important tools of managerial control The constraints built into these systems by so called business process reengineering are a continuation of scientific management principles developed during the late 19th century Additional means of control have included employment based welfare capitalism and human relations and corporate culture approaches This book provides fresh insight into various practices of managerial control from the 1880s to the present and their effects on work organization and quality and worker skill requirements The author highlights current developments including those focused on highly skilled knowledge workers accounting for enhanced automation offshoring and related changes in the production and distribution of goods and services

Trust and Distrust in Digital Economies Philippa Ryan, 2019-05-30 In digital economies the Internet enables the platformisation of everything Big technology companies and mobile apps are running mega marketplaces supported by seamless online payments systems This rapidly expanding ecosystem is fueled by data Meanwhile perceptions of the global financial crisis data breaches disinformation and the manipulation of political sentiment have combined to create a modern trust crisis A lack of trust constrains commerce particularly in terms of consumer protection and investment Big data artificial intelligence automated algorithms and blockchain technology offer new solutions and risks Trust in our legal systems depends on certainty consistency and enforceability of the law However regulatory and remedial gaps exist because the law has not kept up with technology This work explores the role of competency and good faith in the creation of social and legal relationships of trust and the need for governance transparency and human accountability to combat distrust particularly in digital economies

Handbook on Measuring Digital Platform Employment and Work OECD, International Labour Organization, European Union, 2023-03-31 National Statistical Offices face

a growing policy demand for better statistics on digital platform employment and work New statistical definitions are needed to avoid undercounting the number of people involved in these jobs *Scarcity, regulation, and the abundance society* Mark A. Lemley, Deven Desai, 2023-04-27 *Business Ethics* David Wasieleski, James Weber, 2019-06-07 As business and society is an inherently multi disciplinary scholarly area the book will draw from work in areas outside of business and management such as psychology sociology philosophy religious studies economics and other related fields as well as the natural sciences education and other professional areas of study **Algorithms and the Assault on Critical Thought** Nancy Ettlinger, 2022-12-30 This book examines the digitalization of longstanding problems of technological advance that produce inequalities and automated governance which relieves subjects of agency and critical thought and prompts a need to weaponize thoughtfulness against technocratic designs The book situates digital era problems relative to those of previous sociotechnical milieus and argues that technical advance perennially embeds corrosive effects on social relations and relations of production recognizing variation across contexts and relative to entrenched societal hierarchies of race and other axes of difference and their intersections Societal tolerance despite abundant evidence for harmful effects of digital technologies requires attention The book explains blindness to social injustice by technocratic thinking delivered through education as well as truths embraced in the data sciences coupled with governance in universities and the private sector that protect these truths from critique Institutional inertia suggests benefits of communitarianism which strives for change emanating from civil society Scaling postcapitalist communitarian values through communitybased peer production presents opportunities However enduring problems require critical reflection continual revision of strategies and active participation among diverse community citizens This book is written with critical geographic sensibilities for an interdisciplinary audience of scholars and graduate and undergraduate students in the social sciences humanities and data sciences
